Information

on issues and questions of the Committee on the Elimination of Discrimination against Women with regard to consideration of the periodic report of the Russian Federation on implementation of the Convention on the Elimination of All Forms of Discrimination against Women

Item 1

The report on implementation of the Convention on the Elimination of All Forms of Discrimination against Women was prepared by the Ministry of Health and Social Development of the Russian Federation, taking into account the “General guidelines regarding the form and content of reports received from States Parties under article 18 of the Convention”, the “Guidelines for the preparation of second periodic reports” set out in document CEDAW/C/7, and also the concluding remarks of the United Nations Committee on the Elimination of Discrimination against Women on the results of consideration of the fifth periodic report on the implementation in the Russian Federation of the United Nations Convention on the Elimination of All Forms of Discrimination against Women.

The present report utilizes information submitted by the Ministry of Health and Social Development of the Russian Federation, the Ministry of Education and Science Of the Russian Federation, the Ministry of Internal Affairs of the Russian Federation, the Ministry of Economic Development of the Russian Federation, the Ministry of Regional Development of the Russian Federation, the Ministry of Agriculture of the Russian Federation, the Ministry of Justice of the Russian Federation, the Ministry of Culture of the Russian Federation, the Ministry of Finance of the Russian Federation, the Ministry of Foreign Affairs of the Russian Federation, the Federal Service for Labour and Employment, the Federal Service for State Statistics, the Federal Penitentiary Service, the Federal Agency for Physical Culture and Sport, the Supreme Court of the Russian Federation, the Office of the Prosecutor General of the Russian Federation, the Committee on Family, Women’s and Youth Affairs of the State Duma of the Federal Assembly of the Russian Federation, and the Office of the Ombudsman for Human Rights in the Russian Federation.

In the period under review, non-governmental and women’s social organizations carried out a large amount of work with regard to implementing the Convention and played an active part in disseminating knowledge concerning the provisions of the Convention.

Women’s organizations held all-Russian and regional conferences devoted to the situation of women in Russia and to gender equality issues, including an international conference on “Gender problems in modern Russia”, an all-Russian forum entitled “Women of Russia: yesterday, today, tomorrow” and others:

the Ministry of Health and Social Development of the Russian Federation held a round-table discussion on “Women and development: reality and prospects. An appraisal of the implementation of the Convention of the Elimination of All [Forms of] Discrimination against Women, the Beijing Platform for Action and the Millennium Development Goals”;

the State Duma of the Federal Assembly of the Russian Federation held parliamentary hearings on: “Women’s rights in Russian legislation – a decade of implementing the Beijing Platform for Action”, “The evolution of women’s rights: on the 100th anniversary of the first All-Russian Women’s Congress”, a round-table discussion by the State Duma Committee on Family, Women’s and Youth Affairs on “Equality of men and women before the law: prospects for the development of legislation” was devoted to the 30th anniversary of the adoption by the United Nations General Assembly of the Convention on the Elimination of All Forms of Discrimination against Women;

the Civic Chamber of the Russian Federation carried out, as part of the work of the Commission on International Cooperation and Public Diplomacy, a sociological study on “Problems of female entrepreneurship in Russia”, a series of round-table discussions on this subject, including on implementation of the United Nations Convention on the Elimination of All Forms of Discrimination against Women with particular emphasis on alleviating female poverty, empowering women in the economic sphere and developing female entrepreneurship;

the Gender Theme Group, which includes the UN agencies (UNDP, ILO, UNFPA, WHO, UNODC, UNICEF, UNESCO, the United Nations Information Centre and the World Bank) working in Russia, has carried out a large amount of work on implementing the Convention and the Millennium Development Goals. The Group prepared national reports: “Gender equality and the empowerment of women in Russia in the context of the Millennium Development Goals” (2005), including a report of the United Nations in the Russian Federation on implementation of the Convention on the Elimination of All Forms of Discrimination against Women (2009).

With support from the Gender Theme Group, non-governmental organizations implemented projects including “2006. A thousand women’s testimonies and stories. Proposals for improving the status of women in Russia”, a UNIFEM project on “Gender budgets in Russia” and others.

Item 2

Annexes 1 and 2 to this Information contain updated statistical data on areas covered by the Convention.

In order to arrange for the continuous collection and analysis of data for the purposes of establishing the actual situation of women from more disadvantaged population groups, in 2009 the Federal Service for State Statistics began publishing and placing on the statistical bulletin website “Socio-economic indicators of poverty”, which, based on the results of a sample survey of household budgets, provided information describing the status of underprivileged population groups from a gender perspective. In addition, based on the results of the survey of household budgets, data describing the employment status of heads of households, disaggregated by gender, will be published according to the results for 2009.

At the same time, we would like to make it known that in the Russian Federation the practice of encouraging women to participate in various international events at the intergovernmental level has been widely expanded.

The Russian Ministry of Foreign Affairs (MID of Russia) is pursuing a targeted policy aimed at attracting women into diplomatic work within the ministerial system. At the present time, 140 women are working in diplomatic positions in the MID of Russia (as at 14 December 2009). In 2009, women made up 43.33 per cent of the total accepted for the first time for work in diplomatic positions in the MID of Russia.

Female employees of the Central Bureau of the MID of Russia holding diplomatic rank (83 women in total) make up 29.43 per cent of the total number of diplomatic employees in the Central Bureau of the Ministry. At the same time, 39 women occupy leadership positions: 8 are deputy directors of departments and 31 are directors of departments. In the Ministry’s foreign offices, women holding diplomatic rank make up 17.92 per cent (57 women in total) of the total number. These include an ambassador in Mauritius, a consul general in Australia and a permanent delegate to UNESCO in France.

Item 3

In accordance with the Constitution of the Russian Federation (part 4 of article 15), the generally recognized principles and norms of international law and the international agreements of the Russian Federation are an integral part of its legal system. If an international agreement of the Russian Federation establishes rules other than those provided for by law, the rules of the international agreement shall be applied.

International agreements of the Russian Federation, along with the generally recognized principles and norms of international law, are an integral part of its legal system (resolution No. 5 of the Plenum of the Supreme Court of the Russian Federation of 10 January 2003).

According to part 3 of article 6 of the Federal Law “On international agreements of the Russian Federation”, the provisions of officially published international agreements of the Russian Federation not requiring the adoption of intrastate acts for their application take immediate effect in the Russian Federation.

Draft Federal Law No. 284965-3 “On state guarantees of equal rights and freedoms for men and women and of equal opportunities for their attainment” was submitted to the State Duma on 16 January 2003 by deputies to the State Duma V. V. Volodin, Y. F. Lakhova, O. V. Morozov and G. I. Raikov during the time when they exercised powers as State Duma deputies. The Committee for the Affairs of Public Associations and Religious Organizations was appointed to be in charge of preparing the draft law for consideration by the State Duma.

On 16 April 2003 the draft law was passed by the State Duma in its first reading. After adoption of the draft law – on 20 May 2003 – comments were received from the President of the Russian Federation (V. V. Putin) regarding its conceptual provisions.

From the conclusion of the President of the Russian Federation

(letter of 22 May 2003 No. Pr-904)

The draft law (chapter II, in particular) contains a significant number of provisions which proclaim guarantees of equal working and voting rights for men and women and of their equality in the social sphere, in access to state and municipal services, in the receipt of education and in other spheres.

In duplicating these provisions, the draft law does not take into account the systemic requirements of Russian legislation.

In order to determine more clearly the relations regulated by this law, a series of provisions of the draft law would have to be specified more concretely, stipulating in doing so mechanisms and procedures directed toward securing and implementing the guarantees established by it. At the same time, this specification must not distort the meaning and purposes of the proposed draft law, since the demands to observe the quantitative relations of persons of different sex in practice may turn into discriminatory measures of a kind. For example, article 10 of the draft law proposes that, when organizations (structural subdivisions) are being replenished with staff and workers promoted, other conditions being equal, the principle of giving preference to persons of that sex in respect of which there is a gender imbalance in the organization concerned be applied. In this way, admission to employment or occupational promotion may be refused on gender grounds, which is at variance not

only with the meaning and purposes of the draft law but also with the Constitution of the Russian Federation.

The remark indicated also relates to article 13 of the draft law, according to which, when the outcome of a competition to fill vacant positions in government service is decided, priority should be given to a person of that sex which is represented in the minority in the government posts to fill which the competition was held.

Objection is raised to the statement in article 3 of the draft law that the adoption and implementation of special programmes whose aim is to eliminate discrimination on the grounds of sex is one of the main directions of government policy in the area of securing gender equality. Firstly, verification of discrimination calls for the application of measures of accountability and not the adoption of special programmes. Secondly, it is not clear which programmes are specifically being referred to.

Article 6 of the draft law guarantees the introduction of gender education courses and the development of scientific research into issues of gender equity. Such guarantees presuppose the expenditure of budgetary funds, and above all of funds from the federal budget. However, as analysis of the explanatory note shows, this was not taken into consideration in the development of the draft law.

It is proposed that article 9 of the draft law, concerning questions of judicial proceedings, be excluded since its provisions do not pertain to the object of regulation of this federal law.

In pursuance of the principle of the separation of powers, questions concerning the structure of organizations within the jurisdiction of the federal executive-branch agencies and the executive-branch agencies of constituent entities of the Russian Federation (article 21 of the draft law) are not subject to legislative control.

In accordance with articles 20 and 21 of the draft law, the Government of the Russian Federation, the Ombudsman for Human Rights in the Russian Federation and ombudsmen for human rights in constituent entities of the Russian Federation are vested with powers concerning the guarantee and protection of equal rights and freedoms of men and women. This does not fully take account of the fact that the activity of the Government of the Russian Federation and of the Ombudsman for Human Rights in the Russian Federation is governed by federal constitutional laws, but the activity of ombudsmen for human rights in constituent entities of the Russian Federation is governed by the laws of the constituent entities of the Russian Federation.

The provisions of articles 7, 11 and 26 of the draft law are, in terms of their content, not legal in character, in pursuance of which they need to be defined more concretely.

The draft law requires further amendment to take into account the observations stated.

On 6 March 2006, on the initiative of one of the authors of the draft law – deputy to the State Duma, Y. F. Lakhova – the Committee on Women's, Family and Youth Affairs held a round-table meeting to discuss a working version of the draft law prepared for a second reading. However, the meeting participants failed to reach a consensus of opinion on the question of how to progress further with the draft law.

On a motion by the Committee for the Affairs of Public Associations and Religious Organizations on 11 November 2008, the Council of the State Duma passed a resolution assigning responsibility for the draft law to the Committee on Women's, Family and Youth Affairs (Protocol No. 64, п. 49).

By resolution of the Committee on Women's, Family and Youth Affairs of 18 November 2008 года (Protocol No. 3.6-12/26), the draft law was referred to the Council of the State Duma with a request for the period for the submission of amendments to be extended. The Committee's request was complied with, and the period for the submission of amendments was extended to 30 December 2008.

The total number of amendments submitted was 89, applying to practically every article of the draft law.

The view is expressed most fully in the following reasons: "the majority of the provisions of the draft law do not contain rules establishing rights, but are of an informative, referential or declarative nature"; "the relations under consideration do not require additional regulation by law". It is also pointed out that the Constitution of the Russian Federation and federal laws enshrine guarantees of equal opportunities for men and women and prohibit sexual discrimination, as well as establishing liability for its manifestation. The conclusion reached is that "the task of the state at the present time is to establish an effective mechanism for ensuring the enforcement of existing legal norms which enshrine the principle of equal rights for men and women".

The official opinion of the Government of the Russian Federation states that on the whole the provisions of the draft law duplicate the rules of existing legislative acts. The draft law is not supported by the Government.

OFFICIAL OPINION

on the draft Federal Law No. 284965-3 "On state guarantees of equal rights and freedoms for men and women and equal opportunities for their realization", submitted to the State Duma by deputies to the State Duma of the Federal Assembly of the Russian Federation, V. V. Volodin, Y. F. Lakhova, O. V. Morozov and G. I. Raikov

A draft Federal Law "On state guarantees of equal rights and freedoms for men and women and equal opportunities for their realization" has been considered by the Government of the Russian Federation.

The proposed draft law defines the main directions of state policy in the area of gender equity and also provides measures for preventing discrimination on the grounds of gender. Issues of gender equity are topical, since they are aimed at realizing state policy on guaranteeing equal rights and freedoms for men and women and at preventing discrimination on gender grounds as essential conditions for the country's stable and sound development.

At the same time, comments and suggestions have been made in respect of the proposed draft law.

The rules of the draft law duplicate to a significant extent the provisions of existing normative legal acts of the Russian Federation. Thus, articles 2 and 7 of the draft law, providing a guarantee of equal rights and equal opportunities for men and women, including in the area of access to the economic resources of society, duplicate the provisions of the Constitution of the Russian Federation (articles 19, 29, 34, 35, 36, 37 and others). In accordance with part 1 of article 5 of the draft law, the citizens of the Russian Federation are guaranteed the opportunity to obtain education regardless of

gender, which is already regulated by article 5 of the law of the Russian Federation “On education”. Articles 13, 14 and 15 of the draft federal law, establishing equal opportunities for persons of both sexes to enter and pass through state and municipal services, reiterate the norms of the federal laws “On the fundamentals of state service of the Russian Federation” (item 5 of article 5) and “On the fundamentals of municipal service in the Russian Federation” (item 6 of article 5).

Certain provisions of the draft law conflict with the rules of the Constitution of the Russian Federation and of existing federal laws. In particular, article 11 of the draft law establishes the dependence of the number of persons of one or other gender dismissed from employment on the existence of proportionate numbers of staff, which conflicts with the constitutional principle of gender equity and with article 179 of the Labour Code of the Russian Federation, according to which employees having a higher labour productivity and qualifications have a preferential right to remain in employment.

In connection with the statement set out hereinabove, the Government of the Russian Federation proposes finalizing the draft law, after first defining its place and role in the system of Russian legislation.

Deputy Chairman of the Government of the Russian Federation
Minister of Agriculture of the Russian Federation A. Gordeev

On 17 February 2009, the Committee on Women’s, Family and Youth Affairs passed a resolution to set up a working group to examine the question of the possibility of drawing up a draft law “On the introduction of amendments to certain legislative acts of the Russian Federation relating to state guarantees of equal rights and freedoms for men and women and equal opportunities for their realization”.

Three joint meetings of the working group and a Council of Experts set up under the Committee on Women’s, Family and Youth Affairs took place. Terms of reference were prepared for drawing up a draft law “On the introduction of amendments to certain legislative acts of the Russian Federation in order to provide guarantees of the equality of rights and freedoms for men and women” in place of draft Federal Law No. 284965-3, which was passed in its first reading.

However, participants in a round-table meeting to discuss “Legal equality of men and women: prospects for the development of legislation”, which was held by the Committee on Women’s, Family and Youth Affairs on 15 December 2009, came out in favour of extending work on preparation of the draft Federal Law No. 284965-3 “On state guarantees of equal rights and freedoms for men and women and of equal opportunities for their realization” for consideration by the State Duma in its second reading and of the need to develop a draft law “On the introduction of amendments to certain legislative acts of the Russian Federation in connection with the adoption of a Federal Law “On state guarantees of equal rights and freedoms for men and women and of equal opportunities for their realization”. Work on the draft law will therefore continue.

Item 4

Article 19 of the Constitution of the Russian Federation, under which all are equal before the law and the courts, has as its object the protection of a relationship between the state and state authorities and the individual that respects human dignity, is just and is equal.

Under article 46 of the Constitution of the Russian Federation everyone is guaranteed judicial protection of his or her rights and freedoms, and under article 48 the right to receive qualified legal assistance.

In a case where a woman considers that her rights and freedoms have been violated by the actions and decisions of officials, she is entitled to appeal against these in accordance with the requirements of the Law of the Russian Federation dated 27 April 1993 No. 4866-1 "On judicial appeal against actions and decisions violating the rights and freedoms of citizens".

Women's labour rights are protected by the Labour Code of the Russian Federation. Under article 3 of this Code, everyone has equal opportunities to realize their labour rights. No-one can be restricted in their labour rights and freedoms or receive any advantages, irrespective of sex, race, skin colour, nationality, language, origins, property, family, social or official status, age, place of residence, religious beliefs, political convictions, affiliation or non-affiliation to public associations, as well as other circumstances not related to the worker's professional qualities.

The content of said article conforms fully with ILO Convention No. 111 "Concerning discrimination in respect of employment and occupation" of 1958, which is in force in the territory of the Russian Federation.

The examination of labour disputes concerning persons who consider that they have been subjected to discrimination (part 3 of article 391 of the Labour Code of the Russian Federation) falls within the direct jurisdiction of the courts. Previously, it was also possible with a claim for the removal of discrimination to appeal to bodies within the federal labour inspectorate system. The current wording of article 3 of the Labour Code of the Russian Federation makes no provision for such an appeal, since these bodies may not discharge functions that are intrinsically the province of the courts.

In accordance with the established jurisdiction, appeals against violations of rights and lawful interests guaranteed by legislation are also considered by state regulatory and supervisory bodies which take measures, including administrative and criminal, within the scope of the powers granted them to eliminate such violations and to call to account guilty persons.

Material losses and moral damage inflicted on a citizen by recognized unlawful actions (decisions) as well as by the presentation of falsified information are also liable to compensation in judicial proceedings.

In Russian legislation, an additional definition of discrimination as a criminally punishable act is contained in article 136 of the Criminal Code of the Russian Federation. Under this article, violation of a person's human and civil rights, freedoms and lawful interests on the grounds of his/her sex, race, nationality, language, origins, property or official status, place of residence, religious beliefs, convictions or affiliation to any social groups or public associations is deemed discrimination.

The rights of citizens may be protected in civil legal proceedings (article 11 of the Civil Code of the Russian Federation) by way of recognition of the right, restitution of the violated right or recognition of an act promulgated by an agency of the state as being inconsistent with the law.

Civil legislation protects non-material benefits, in particular, the honour and dignity of the individual, the right to freedom of movement, the inviolability of the individual (article 150 of the Civil Code of the Russian Federation), article 151 (Compensation for moral damage), article 152 (Protection of honour, dignity and business reputation).

For protection from discrimination, women have the right of recourse to the Committee for the Elimination of Discrimination against Women (under the Optional Protocol to the Convention), to the

European Court for Human Rights and to the Commissioner on Human Rights in the Russian Federation.

The Commissioner on Human Rights in the Russian Federation, in accordance with the federal constitutional law No. 1-FCL, dated 26 February 1997, regulating his activity, examines complaints from appellants concerning violations of their rights and freedoms, including rights to equality of all before the law and the courts, irrespective of gender, and the enjoyment by men and women of equal opportunities for their realization, guaranteed for all by article 19 of the Constitution of the Russian Federation.

In implementing state protection of the designated constitutional human and civil rights and freedoms, the Commissioner on Human Rights in the Russian Federation proceeds, in particular, on the basis of General Comment 18: “Non-discrimination” (37th session 1989) of the (UN) Human Rights Committee concerning protection against discrimination guaranteed by article 26 of the International Covenant on Civil and Political Rights, which pointed out that the term “discrimination” should be understood as meaning any distinction, exclusion, restriction or preference which has the purpose or effect of nullifying or impairing the recognition, enjoyment or exercise by all persons, on an equal footing, of all rights and freedoms; the enjoyment of rights and freedoms on an equal footing, however, does not mean identical treatment in every instance, but any differentiation in treatment that exists does not constitute discrimination provided that the criteria for it are reasonable and objective and if their aim is to achieve a purpose which is permitted under this international covenant.

Complainants, who may be women who are citizens of the Russian Federation or foreign citizens or stateless persons who find themselves in the territory of the Russian Federation, are entitled freely to file a complaint with the Commissioner on Human Rights in the Russian Federation provided that they have previously lodged a complaint against a decision or action (inaction) of a state agency, local government agency, official or civil servant violating their rights and freedoms, and are not in agreement with a decision that has been taken; a complaint must be filed no later than one year from the date of the violation of the rights and freedoms of the complainant or from the date when the complainant became aware of their violation; a complaint is not subject to any government levy.

It should, however, be noted that over the specified period no complaints have been received by the Commissioner on Human Rights in the Russian Federation from the designated category of complainants concerning their discrimination on gender grounds.

In accordance with the powers granted by the federal constitutional law referred to hereinabove, the Commissioner on Human Rights in the Russian Federation has, for the purposes of implementing state protection of violated human and civil rights and freedoms recognized in the Russian Federation in accordance with the generally recognized principles and norms of international law (including the Convention on the Elimination of All Forms of Discrimination against Women), the right:

- to send to the state agency, local government agency or to the official whose decision or action (inaction) is deemed to be a violation of the rights and freedoms of the complainant, a conclusion containing recommendations with regard to possible and essential measures for their restitution, said recommendations being subject to examination and notification in writing within one month about measures that have been taken;
- to file a petition in court in defence of the rights and freedoms of the complainant which have been violated by a decision or action (inaction) of a state agency, local government agency or official;

- to petition the competent state agencies for the initiation of disciplinary or administrative action or criminal proceedings against the official whose decisions or actions (inactions) are deemed violations of human and civil rights and freedoms;
- to petition a court or the prosecutor’s office to investigate a decision which has acquired the force of law, a court’s sentence, a determination or ruling of a court or a ruling by a judge which has violated human and civil rights and freedoms;
- to file a complaint with the Constitutional Court of the Russian Federation of a violation of constitutional human and civil rights and freedoms by a law which has been applied or is to be applied in a specific case.

Where information is received of large-scale or gross violations of the rights and freedoms of citizens either in cases having special public significance or connected with the need to protect the interests of persons unable independently to use the available legal means of protection, the Commissioner on Human Rights in the Russian Federation is also entitled to take appropriate measures on his own initiative.

In cases indicating gross or large-scale violations of constitutional human and civil rights and freedoms, the Commissioner on Human Rights in the Russian Federation is entitled:

- to deliver a report about these to the next plenary session of the State Duma;
- to appeal to the State Duma with a proposal to establish a parliamentary commission to investigate the facts and circumstances which have served as grounds for the conduct of parliamentary hearings by it.

Based on the facts of the violations of the rights and freedoms of citizens, the Commissioner on Human Rights in the Russian Federation is also entitled to appeal to the State Duma with a proposal for the conduct of parliamentary hearings by it.

At the end of the calendar year, the Commissioner on Human Rights in the Russian Federation sends a report on his rights protection activity to:

- the President of the Russian Federation,
- the Federation Council and State Duma – the chambers of the Federal Assembly of the Russian Federation,
- the Government of the Russian Federation,
- the Constitutional Court of the Russian Federation,
- the Supreme Court of the Russian Federation,
- the Supreme Arbitration Court of the Russian Federation,
- the Prosecutor General of the Russian Federation.

In the annual report on his activity, which is subject to mandatory official publication in “Rossiyskaya Gazeta”, the Commissioner on Human Rights in the Russian Federation provides the legislative, executive and judicial authorities with information on violations of the rights, freedoms and lawful interests of citizens which have occurred, measures for their restoration and for the rectification of causes giving rise to such violations and of conditions contributing to them, and proposals for improving law enforcement practice and the legislation in force on human and civil rights and freedoms

with a view to bringing these into accord with generally recognized standards and the international obligations of the Russian Federation.

One of the sections in the report on the activity of the Commissioner on Human Rights in the Russian Federation in 2001, which was also published in a separate edition numbering 5,000 copies and distributed among others to non-governmental organizations, was devoted to the question of eliminating violence against women, especially in the family, linked to the commission of crimes such as premeditated murder, the infliction of grievous bodily harm, torture, battery, threat and insult.

The problems of protecting the rights of victims of crimes were also covered in a special report bearing the same name which was prepared by the Commissioner on Human Rights in the Russian Federation in 2008, of which 1,000 copies were published for distribution in particular among law-enforcement agencies and social organizations.

Information on the activity of the Commissioner on Human Rights in the Russian Federation and the forms and methods this takes, on mechanisms for the implementation of state protection of human and civil rights and freedoms, and also on the ways in which his powers are exercised in practice is placed on his publicly accessible official internet website.

The Commissioner on Human Rights in the Russian Federation and the federal state civil servants on his working staff periodically make statements in the electronic and printed media on the most pressing problems of human rights protection work in connection with ensuring the safety of citizens from violations of their rights and freedoms, including from any forms of discrimination.

Issues of cooperation in implementing its powers regarding the state protection of human and civil rights and freedoms are systematically discussed by the Commissioner on Human Rights in the Russian Federation at coordinating meetings with human rights commissioners in constituent entities of the Russian Federation, for which posts have been set up in 51 constituent entities of the Russian Federation.

Items 5-6

Gender stereotypes manifest themselves in the everyday life of Russia in the widely held views that the function of the woman revolves around the home and the family, that the areas of management and politics are male domains, that the man is the family breadwinner and must therefore earn more, that family life is a private matter, and so on.

The development of gender education, gender analysis of legislation by experts, and the active involvement of women's organizations in this issue are helping to overcome gender stereotypes.

At the present time, a variety of gender courses are studied at 115 universities and higher educational institutions in Russia. In addition to this, there are more than 30 gender centres and research teams in operation (in Barnaul, Veliky Novgorod, Vladivostok, Voronezh, Yekaterinburg, Ivanovo, Irkutsk, Moscow, Murmansk, Naberezhnye Chelny, Nizhny Novgorod, Petrozavodsk, Pskov, Ryazan, Samara, Saratov, Saint Petersburg, Tver, Tomsk, Chelyabinsk and others).

Projects aimed at overcoming gender stereotypes among young people, school pupils and students are being implemented in various regions.

For example, in Altai krai a project on "Overcoming gender stereotypes in the public consciousness by means of awareness-raising and educational programmes in rural areas of Altai krai" (2006) has been implemented, and the Moscow centre for gender studies has conducted a gender analysis of textbooks, including also of state educational standards, for higher education, as well as of

text books and study manuals for higher educational institutions recommended by educational and methodological associations or by the Ministry of Education and Science of the Russian Federation (2007).

In a number of regions of Russia, governor's offices have operating under them at the republic, krai and oblast levels interdepartmental commissions on the problems of improving the status of women as well as women's social chambers, whose work is targeted at, among other things, providing women with information about rights, raising legal literacy and providing assistance in complex life situations.

Social and legal services for women are provided by social protection institutions which operate in every constituent entity in the Russian Federation.

Items 7-11

Violence against women is a breach of their rights and fundamental freedoms guaranteed by the Constitution of the Russian Federation.

The problems of violence against women are the subject of intense scrutiny by the government authorities. Measures of liability, including criminal liability, are provided for different types of violence. These include offences against sexual inviolability, murder, battery, torture, causing physical and psychological suffering, slander and insult that denigrate human dignity or the person of the victim and trafficking in people.

During recent years, the volume of registered reports of domestic violence against women has been small. In 2008-2009, their number did not make up more than 4 per cent of the overall pattern of crime.

According to data from the Office of the Prosecutor General of the Russian Federation, in 2008 alone 2,303,752 persons were identified as victims of criminal offences, of whom 902,887 were women. This figure includes 46,010 persons, of whom 11,047 were women, who died as a result of crimes being committed, and 48,467, of whom 8,178 were women, who suffered grievous bodily harm.

The number of crimes committed in 2008 which were linked to violent acts against women was 223,518 and the figure for the first half of 2009 was 114,939.

In 2008, 13,552 women (in the first half of 2009 – 7,008) were victims of crimes of a sexual nature, and of these 5,486 (2,662 in the first half of 2009) were victims of rape, and 3,237 (1,587 in the first half of 2009) were victims of violent acts of a sexual nature. The number of women drawn into prostitution was 241 (142 in the first half of 2009).

In the first half of 2009, 16,101 women became victims of a crime committed by a family member, in 8,217 of these cases the perpetrator being the husband of the victim. The corresponding figures for 2008, were: 26,531 and 13,942.

It should be noted that the percentage of crimes involving sexual violence against women stands at just 0.4 per cent. The rate of detection of such crimes is 96 per cent.

For each indicator of the violation of the rights and lawful interests of women, the prosecutors arrange corresponding checks, in the light of which response measures aimed at eliminating the identified infringements of the law are taken by the prosecutors.

According to data from the Ministry of Internal Affairs of the Russian Federation (MVD of Russia), during 2009 222,500 crimes accompanied by violent acts were committed against women,

including 13,200 of a sexual nature. 4,800 criminal proceedings were initiated on the basis of article 131 (rape) of the Criminal Code of the Russian Federation and 3,300 on the basis of article 132 (violent acts of a sexual nature). A significant number of property crimes whose victims were women were recorded. Thus, 34,500 criminal proceedings were initiated on the basis of article 161 (robbery), and 11,100 proceedings on the basis of article 162 (robbery with violence).

In 2009, 230,300 women became victims of crimes of the category specified, which exceeded the corresponding indicator for 2008 by 3.1 per cent, while at the same time the number of victims of violent crimes of a sexual nature increased by 6.6 per cent (from 13,500 to 14,500).

Experience shows that the main causes of the occurrence of violence are the spread of domestic drunkenness and alcoholism, unemployment (more than half of those who committed crimes did not have a regular source of income), property disputes and, as a consequence, the growth of conflict situations in families.

Thus, the majority of crimes (120,500) against women which are accompanied by violent acts are committed in an apartment or private house, i.e. in the home. At the same time, 28,100 women were family members, and of these 14,500 were spouses.

Liability for rape is established by article 131 of the Criminal Code of the Russian Federation. Spousal rape is not distinguished as an independent category of crime. The Criminal Code of the Russian Federation contains no specific provisions concerning the protection of elderly women or women with a disability; non-specifically, the commission of a crime against a defenceless or helpless person or a person who is dependent on the guilty person (sub-item h of part 1 of article 63 of the Criminal Code of the Russian Federation) is an aggravating circumstance.

In 2,400 cases of crimes accompanied by violent acts the victims were women with a disability.

The Criminal Code of the Russian Federation does not contain any specific provisions concerning the protection of elderly women or women with a disability; non-specifically, the commission of a crime against a defenceless or helpless person or a person who is dependent on the guilty person (sub-item h of part 1 of article 63 of the Criminal Code of the Russian Federation) is an aggravating circumstance.

It is believed that the figures available for so-called “family” crime are somewhat underreported. This can largely be explained by the unwillingness of the victims themselves to call the “offenders” to account.

In order to prevent such crimes, the internal affairs agencies carry out work to identify persons committing offences in the area of family and domestic relations, chronic alcoholics and mentally ill persons who present an immediate danger to those around them, and timely preventive measures are applied. In addition, explanatory work is carried out with the aim of persuading persons who are ill due to drug addiction or alcoholism voluntarily to undertake a course of treatment in special drug addiction centres.

As at 1 January 2010, 3.5 million persons are on preventive treatment registers for antisocial behaviour, including 261,300 who fall into the category of “family troublemakers”, 372,200 chronic alcoholics systematically committing offences, 167,100 drug addicts, and 50,300 mentally ill citizens whose behaviour presents a danger to those around them, primarily to women and children.

By decision of the Security Council of Russia, the law-enforcement agencies have been set the task of preparing draft laws to bolster the status of victims and to ensure their safety, including for

women who have been victims of domestic violence. Over the coming three years, the state plans to allocate 1.604 billion roubles to fund programmes of assistance to victims.

In order to prevent incidents of violence against women and to render prompt assistance to women who find themselves in difficult life situations, exposed to violence or the threat of it being used, appropriate programmes are being developed and implemented in constituent entities of the Russian Federation and specialist services are being established which are capable of responding effectively to such incidents. Details of these are set out under item 37 of the Report on the implementation in the Russian Federation of the UN Convention on the Elimination of All Forms of Discrimination against Women (combined sixth and seventh periodic report).

A great deal of work on averting and preventing domestic violence is being carried out in the constituent entities of the Russian Federation.

Thus, in accordance with plans adopted by the Government of St. Petersburg in 2006-2007 for the development of social welfare for the general population and of family policy, a programme of "Social support for women who have suffered from violence" is currently being implemented. The programme is targeted at providing complex assistance to women who have suffered from sexual, physical and psychological violence, as well as at training telephone helpline counsellors for work with gender-based violence.

In 1995, the first social protection institution in the Russian Federation catering for women with children, the "Crisis centre for Women", opened in St. Petersburg. Since the centre has been in operation, more than 65,000 people have received various kinds of assistance there.

In order to provide psychological and legal assistance to women who find themselves in a difficult life situation and who have been subjected to domestic violence, including sexual abuse, the St. Petersburg social organization "Women's Health in St. Petersburg" has published information and reference materials entitled "Family without violence – society without terror".

A targeted regional programme "Social support for people who find themselves in a difficult life situation, including women who have suffered from violence" is being implemented in Krasnoyarsk krai (territory). A non-governmental organization, the "'Willow' crisis centre for women and their families who have been subjected to violence" operates on a permanent basis in the territory's centre.

Decree No. 1129, dated 11 July 2009, established in Krasnoyarsk krai a Plan of Action for Ensuring Gender Equality in Krasnoyarsk Krai for the Period 2009-2011, covering such aspects as informing people about the resolution of gender issues, ensuring equal rights for men and women on the labour market, health protection and occupational safety of men and women, developing a system of social services for women and children and providing assistance to victims of violence, stabilizing family relations and improving the image of fatherhood and motherhood. For the purposes of coordinating execution of the measures provided for under the Plan, the same decree established a commission to examine issues of gender equality.

A coordinating council for the implementation of gender equity policy, headed by the first deputy governor, has been established in Vologda oblast. Since its launch in September 2007, a "white ribbon" campaign has been held in the region's territory each year, aimed at drawing people's attention to the problems of family violence, at shaping a negative attitude toward the fact that it occurs and at organizing opposition to violence in society.

In Orenburg oblast, under the "Life without violence" programme developed in 2006 with its focus on "Organizing work on the social rehabilitation of under-age mothers and girls who have been

living under difficult conditions”, crisis centres for women with children have been opened in the oblast’s cities of Orenburg and Buzuluk, where they are provided with social, medical and psychological assistance.

Women who have been victims of mental and physical abuse in the family and find themselves in severe emotional and psychological crisis, or in a conflict situation which does not allow them to continue living in the family, are provided with temporary refuge and help from qualified specialists.

In order to provide socio-psychological, socio-legal, socio-educational and other types of social assistance to women in Novosibirsk oblast, a department providing assistance to women living in difficult situations has been carrying out its work in the city of Berdsk for over seven years. In Novosibirsk, “Golubka”, a home for mothers which is concerned with the rehabilitation of single mothers who have fallen into difficult life situations has been running for 10 years. Crisis sections have been established within the organizational structure of the Krasnodar and Tuapsinsk centres of social assistance for families and children.

In Kemerovskaya oblast, there are three crisis sections for women who find themselves in difficult life situations. The sections are one of the forms of assistance provided for women aged from 18 to 50 who have been subjected to violence and need housing and assistance in resolving legal issues. The facilities are organized to cater for both daytime stays and a 24-hour in-patient service.

In Ivanovo oblast, the “Public Committee for the Protection of Childhood and Morality” has been operating since 2002; its sphere of activity includes rehabilitation work with women who have been subjected to violence.

Use is also made of such forms of assistance as organizing self-help groups for women who have suffered abuse (Vologda oblast).

There are organizations and institutions providing assistance to women who have been victims of abuse in Perm, Altai and Khabarovsk kraia and in many other regions.

They all provide various kinds of assistance to women and children who have found themselves in crisis situations, including cases where this is due to cruelty. Their objective is to ensure the women’s fullest possible psychological rehabilitation and adjustment within the family and in society and to carry out preventive work aimed at eradicating domestic violence.

In the majority of regions, social rehabilitation and preventive work is implemented in collaboration with internal affairs agencies.

Thus, the Ministry of Internal Affairs of the Republic of Tatarstan has signed a bilateral agreement with the public non-commercial partnership of the “Fatima” women’s crisis centre, which regulates the joint activity of the internal affairs agencies and of employees of the association regarding identifying and gathering information on incidents of violence against women. The centre provides qualified psychological, legal, counselling and other assistance to women who have been victims of abuse.

The Administration of Kostroma oblast together with the Directorate of Internal Affairs for Kostroma oblast are implementing a package of measures aimed at protecting, assisting and rehabilitating women who have been victims of criminal violations. For these purposes, use is also being made of the facilities of the Centre for Practical Psychotherapy and Practical Psychology, which serves as the base for a telephone helpline.

The issue of organizing collaboration between state, municipal and law-enforcement agencies to protect the rights and freedoms of women was examined in March 2009 at a meeting of the interdepartmental commission on preventing legal offences in Ivanovo oblast.

The prevention of violence in the family and domestic sphere requires diagnosis of the causes of family conflict by specially trained personnel, combining enforcement with support and assistance measures and the participation of all interested departments, institutions and social organizations.

Social organizations are quite actively engaged in the issue of violence against women. With their involvement, educational and promotional measures to raise standards and understanding of the situation among employees in the law-enforcement agencies, health care and social services are being strengthened and methodological manuals published. The Centre for the Provision of Personnel Services of the Ministry of Internal Affairs of the Russian Federation is engaging in cooperation with an association of women's non-governmental organizations on preparing recommendations concerning domestic violence.

Actively involved are the "Stop violence" association of crisis centres for women (unites 47 non-governmental crisis centres), the "Sisters" independent charitable centre for support to victims of sexual abuse, the "Falta" centre for assistance for women and the "Yaroslavna" centre for psychological support for women.

International cooperation in this area is being strengthened. Together with the European Institute for Crime Prevention and Control (HEUNI), a reference manual, "Strategies for preventing violence in the family", has been drawn up and published. It contains experience drawn from the activity of law-enforcement agencies in foreign countries in this line of work.

A system of cooperation with international organizations has also been developed in a number of constituent entities of the Russian Federation. For example, in St. Petersburg, the "St. Petersburg Social & Economic Institute", a non-governmental educational institution, is implementing, jointly with the Swedish company "SPRANGBRADAN" and the Swedish Male Network, the "MIR (Men in Russia)" programme, the aim of which is to support the moulding of a culture of non-violence in society by involving men in activities to implement gender equality. Well-known international organizations participating in this work include the Nordic Council of Ministers, the International Labour Organization, the worldwide network of women business owners (FCEM), the American Bar Association (ABA CEELI) and others. With the support of the Nordic Council of Ministers, more than 20 seminars, forums and mass events aimed at implementation of a policy of gender equality have been held in Russia.

The activity of the Fund to Support Children in Difficult Life Situations, which was created under Decree No. 404 of the President of the Russian Federation of 26 March 2008, is aimed at creating a new administrative mechanism which will make it possible, where powers are shared between the federal centre and constituent elements of the Russian Federation, to reduce significantly the prevalence of social deprivation of children and of families with children and to stimulate the development of effective forms and methods of working with families and children in need of assistance.

The main lines of activity of the Fund are connected with the prevention of family break-ups and the social orphanhood of children, the restoration of a family environment that is favourable for raising a child, and the family arrangements for orphaned children and children left without parental care, among other things.

In 2009, the Fund implemented the “Stages of growth” programme to introduce into the practical work of the regions innovative inter-agency tools for preventing family break-up and social orphanhood (networking, intensive family therapy, support for parenthood, social management, etc.).

The following have been selected as pivotal regions for the spread of innovative tools: Altai krai, Moscow, Volgograd, Vologda and Saratov oblasts, the Republic of North Ossetia-Alania and Khanty-Mansi Autonomous Okrug-Yugra.

Under this programme, 485 specialists from 14 regions of Russia have undergone training. In 2009, 193 projects and 60 regional programmes were selected from 1,190 projects and 119 regional programmes which had approached the fund, and more than 122 million roubles has already been transferred for their implementation.

Item 12

In 2009, the law-enforcement agencies of the Chechen Republic did not receive any reports of the unknown disappearance or kidnapping of women connected with the members of illegal armed organizations.

On 2 November 2009, the public prosecutor’s office in the Leninsky district of Grozny received notification from L. Kh. Gaisanova concerning the kidnapping on 31 October 2009 of her daughter Z.I. Gaisanova by unknown persons from the yard of house No. 7, located on Darwin Lane in Grozny.

Based on the results of checks carried out on the basis of articles 144-145 of the Code of Criminal Procedure, the investigator of the Leninsky interdistrict investigative department of Grozny’s Investigative Directorate of the Investigative Committee attached to the Public Prosecutor’s Office of the Russian Federation for the Chechen Republic initiated criminal proceedings on 16 November 2009 under item “a” of part 2 of article 126 of the Criminal Code of the Russian Federation, which have been passed for further investigation to department No. 2 (for the investigation of particularly important cases) of the Investigative Directorate of the Investigative Committee attached to the Public Prosecutor’s Office of the Russian Federation for the Chechen Republic.

From operational information, it is known that Z. I. Gaisanova was involved with members of illegal armed organizations. This is indirectly confirmed by the killing on 31 October 2010 of A. A. Khasanov, an active member of an illegal armed group, during the course of special operations carried out by officers of law-enforcement agencies which took place in the household of Z. I. Gaisanova, located at 7 Darwin Lane, Grozny.

At the present time, a criminal case is proceeding, in which investigations and a search operation are being conducted aimed at establishing the whereabouts of Z. I. Gaisanova and the persons who carried out her kidnapping. The fact of Z. I. Gaisanova’s involvement with members of illegal armed groups is being checked by investigative means.

Item 13

With regard to combating trafficking in persons, there is an awareness of the need for a complex approach to countering this type of crime, both at the domestic and at the international level, by means of harmonizing legislation, among other things.

The Russian Federation is fulfilling its obligations with regard to combating trafficking in persons and punishing those who have committed such socially dangerous acts in accordance with the United Nations Convention against Transnational Organized Crime and the Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, which was signed on 12

December 2000. Russia is actively bringing its internal legislation into harmony with the underlying United Nations Conventions in this area.

Trafficking in persons is seen as a multi-faceted social and legal phenomenon, which includes within it a diverse complex of criminal acts. In such an interpretation, trafficking in persons involves crimes linked to coercion to remove human organs or tissues for transplantation, use of slave labour, recruitment to engage in prostitution and the organization of prostitution, the illegal trade in pornographic materials, including with images of minors, as well as the organization of illegal migration.

Since 1998, Russia has participated in combating trafficking in persons within the framework of an Agreement on Cooperation by the Member States of the CIS in Combating Crime.

In 2008, the Interparliamentary Assembly of the Member States of the CIS, with the participation of the Office of the Prosecutor General of the Russian Federation, developed and adopted two model laws “On counteracting trafficking in persons” and “On the provision of assistance for victims of trafficking in persons,” as well as recommendations for the unification and harmonization of legislation of the member states of the CIS in this field, in which special sections are devoted to the activities of the law enforcement and other state agencies and social institutions in relation to combating the sexual exploitation of people. These model acts have been prepared based on an international approach to combating this type of crime and encompass a whole range of measures for preventing, detecting, uncovering and stopping crime, punishing guilty persons and providing assistance for victims.

They provide for states to adopt, in addition to special legislative acts on combating trafficking in persons and providing assistance for its victims, appropriate rules of criminal, administrative and criminal procedure law.

Since 2003, articles 127.1 “Trafficking in persons” and 127.2 “Use of slave labour” of the Criminal Code have been in force.

In November 2008, amendments were incorporated into the Criminal Code of the Russian Federation providing for the aggravation of criminal liability for crimes connected with trafficking in persons. In particular, the definition of “trafficking in persons” was broadened (description specified in the first part of article 127.1 “Trafficking in persons”), while in part 2 of article 127.1 new qualifying criteria were introduced (for example, the act provided for by part 1 of the article, committed against a person known by the guilty person to be in a helpless state or to be materially or otherwise dependent on the guilty person, or against a woman known by the guilty person to be in a pregnant state).

In contrast to the previously existing article 152 of the Criminal Code of the Russian Federation “Trafficking in minors”, the first parts of articles 127.1 and 127.2 establish liability for trafficking in persons and the use of slave labour irrespective of age. The perpetration of these acts against a person known to be a minor forms a qualified category of crimes (item “b” of part 2 of articles 127.1 and 127.2 respectively of the Criminal Code of the Russian Federation). Moreover, minors are defined as all persons up to the age of 18 years.

The legislation of the Russian Federation also provides for administrative liability for engagement in prostitution (article 6.11 of the Code of Administrative Offences of the Russian Federation), deriving income from engagement in prostitution where this income is connected with another person’s engagement in prostitution (article 6.12 of the Code of Administrative Offences of the Russian Federation), and the illegal transportation of persons across the state border of the Russian Federation (article 18.14 of the said code).

State protection measures provided for under the Criminal Procedure Code are aimed at protecting the rights of persons who have been victims of trafficking in persons or are in possession of information about this criminal activity.

No special measures regarding the protection of women and girls from recruitment agencies engaging in trafficking in persons and from marriage agencies specializing in marriages with foreign citizens are provided for under Russian law.

The Federal law “On state protection of victims, witnesses and other parties to criminal proceedings”, which is used to protect victims of crimes, including victims of trafficking in persons, has been in force in the Russian Federation since 2005.

For the purposes of guaranteeing their protection, a state programme “Guaranteeing the safety of victims, witnesses and other parties to criminal proceedings for the period 2009-2013”, which provides a complex set of social rehabilitation and support measures for victims, has been approved by a Resolution of the Government of the Russian Federation.

If trafficking in persons is considered strictly in accordance with the wording of article 127-1 of the Criminal Code of the Russian Federation, which provides for liability directly for trafficking in persons, then the overall number of such crimes in Russia is small and amounts to just a few dozen each year.

For example, over the last few years a number of organized criminal groups engaged in the recruitment of Russian citizens to provide sex services in countries in Western Europe, the Near and Middle east, Africa, Asia and North America has been identified.

Despite their largely concealed nature, over the five year period from 2004 to 2008 more than 25,000 such crimes were detected and more than 15,000 persons guilty of committing such crimes were identified.

In 2009, 66 crimes which qualified under item 2 of part 2 of article 127.1 (trafficking in persons) were recorded. 67 persons who had committed such crimes were identified.

Characterizing the social status of victims, it can be stated that the majority of persons who are objects of human trafficking are women and girls from the least socially protected strata of the population, who are being exploited for prostitution.

Item 14

In order to prevent and suppress trafficking in persons, the operational capacity of all the law enforcement agencies has been brought to bear alongside the investigation agencies. Besides the internal affairs agencies, which contain special subdivisions for combating trafficking in persons and crimes against morality, operational staff of the Federal Customs Service, the Federal Drug Control Service of the Russian Federation and the Federal Security Service of the Russian Federation are also involved in detecting the crimes under consideration.

In pursuance of Order No. Pr-566 of the President of the Russian Federation of 12 March 2009, coordinated operational and preventive measures and special operations “Illegal 2009” were carried out in the period from 15 March to 15 August 2009 in the territory of the Russian Federation by forces of the internal affairs agencies and of the Federal Migration Service of Russia, in order to counter the illegal migration of citizens from third countries, including trafficking in persons.

In the course of carrying out the operation in the territory of the Russian Federation, checks were made of more than 35,000 where the population includes a high proportion of foreign citizens and

stateless persons and of more than 750 organizations providing intermediary services transporting persons across the borders of the Russian Federation under the guise of arranging employment, of which 107 were marital and modelling agencies providing services connected with introductions to foreign citizens, and 544 were tourism companies engaged in preparing documents and visas, including offering services arranging employment abroad.

Checks were made of more than 24,000 employers, who use the labour of foreign workers engaged in labour activity in the territory of the Russian Federation – more than 71,000 citizens.

One of the main objectives of the operation was to uncover and investigate crimes connected with trafficking in persons. Thus, in the course of conducting “Operational Experiment”, an operational investigation to expose persons engaged in trafficking in persons, officers of the Criminal Investigation Directorate of the Main Directorate of Internal Affairs in Moscow, working together with officers of the Immigration Control Department of the Federal Migration Service Directorate arrested U. Khaitsin, a citizen of the People’s Republic of China, and Kao Tkhi Khuye, a citizen of the Republic of Vietnam, who had sold Nguyen Tkhi Khang, a citizen of the Republic of Vietnam, to citizen Chzhan Min Min for further sexual exploitation for 50,000 roubles. Based on these facts, criminal proceedings have been instigated under part 3 of article 127.1 of the Criminal Code of the Russian Federation, and the perpetrators have been arrested and are under investigation.

Moreover, in accordance with the Federal Law No. 128-FZ of 8 August 2001 “On the licensing of specific types of activity”, activity connected with the arrangement of employment for citizens of the Russian Federation outside the Russian Federation is subject to licensing.

The regulations on the licensing of activity connected with the arrangement of employment for citizens of the Russian Federation outside the Russian Federation, which establish that monitoring of the observance of licensing requirements and conditions is carried out by the Federal Migration Service of Russia, was approved by Resolution No. 297 of the Government of the Russian Federation of 23 December 2006.

In respect of violations of the licensing requirements and conditions, liability is provided for in the manner established by the Code of Administrative Offences of the Russian Federation.

Special provisions concerning the protection of women and girls from employment agencies engaging in trafficking in persons and from marital agencies specializing in marriages to foreign citizens are not provided for under Russian law.

Item 15

Engagement in prostitution is an offence under Russian law for which administrative liability is established (article 6.11 of the Code of Administrative Offences of the Russian Federation). No special health protection programmes for women engaged in prostitution have been adopted.

At the same time, constituent elements of the Russian Federation do have experience of developing programmes providing assistance to women engaged in the provision of sexual services.

Thus, in Naberezhnye Chelny (Republic of Tatarstan) an inter-agency programme of “Stabilization of the rate of growth and spread of sexually transmitted diseases and HIV infection in the city for the period 2009-2011” has been developed, financed out of the local and republican budgets.

The aims of the programme indicated are the stabilization of the rate of growth in and number of new cases of HIV infection among persons using injecting drugs, persons providing sexual services for payment and among persons of sexually active age.

Constituent elements of the Russian Federation have centres for preventing and combating AIDS, where information and advisory support and treatment and diagnostic assistance are provided for persons engaged in prostitution and confidentiality is observed.

For example, in Kaluga oblast, the “Kaluga regional centre for preventing and combating AIDS and infectious diseases”, a state health-care institution, is the focal point for measures being taken to prevent HIV infection among the most vulnerable groups in the population (young persons aged 15-29 years, injecting drug users, persons providing sexual services for payment, patients with sexually transmitted infections and women of child-bearing age).

In St. Petersburg, the city’s centre for preventing and combating AIDS serves as a base providing information and advisory support and treatment and diagnostic assistance for HIV-positive and AIDS patients, in the first instance to the most vulnerable groups (young persons from 15 to 29 years of age, injecting drug users, persons providing sexual services for payment, patients with sexually transmitted infections), and carrying out preventive and anti-epidemic work to combat HIV infection.

In Irkutsk oblast, there is a rehabilitation centre for drug dependents “Crossing of the seven roads” in operation where they work with injecting drug users and persons providing sexual services, conduct training courses and carry out informational and promotional work. There is also similar work being done in other constituent elements of the Russian Federation.

The provision of rehabilitation services and advisory assistance is regulated by Federal Law No. 195-FZ of 10 December 1995 “On the foundations of social services for the population in the Russian Federation”. In accordance with the said federal law, citizens who have suffered physical or psychological abuse are provided with temporary refuge, advisory assistance and rehabilitation services, in particular, assistance with social and psychological rehabilitation.

An important role in preventing the problem of trafficking in persons and in minimizing its consequences is played by the state social protection agencies, which help to resolve issues of the social and physical rehabilitation of victims of trafficking in persons and their subsequent integration into society: agencies and institutions of the Ministry of Health and Social Development of the Russian Federation, employment services, guardianship and trusteeship agencies, social home-support services, social services institutions, consultant psychologists’ offices, “telephone helplines” etc.

Russia is faced with the task of further improving its national legislation to take into account common principles developed at the international level for combating trafficking in persons and raising the effectiveness of the work of law-enforcement agencies.

Item 16

See items 3 and 5.

The problem of the promotion of women to leadership positions remains topical. With the aim of improving state and municipal administration and the creation and effective use of a reserve of administrative personnel for priority areas of the economy, federal government agencies, government agencies of constituent elements of the Russian Federation and local government agencies, Decree No. 1252 of the President of the Russian Federation of 25 August 2008 formed a Commission reporting to the President of the Russian Federation on the creation and training of a reserve of administrative personnel.

In accordance with the Decree, a Russian national reserve of high-potential administrative personnel is being established – a single openly accessible database of the best specialists on three

management levels: municipal, regional and federal. Professionals with the most promising prospects have been included in what has been termed the President's quota, comprising 100 individuals, 11 of them women.

Subsequently, a further 500 individuals have joined the reserve, including 162 representatives of federal government (32.4 per cent), 94 representatives of regional government agencies (18.8 per cent), 149 business representatives (29.8 per cent) and 95 representatives from the fields of science and education and from state institutions and public organizations (19 per cent). The list contains 79 women (15.8 per cent).

By the middle of 2009, the number of persons included in the reserves of management personnel of the constituent elements of the Russian Federation stood at 30,308. Work on the establishment and use of municipal reserves of management personnel continues. Personnel reserves have been created in 63 of the 83 constituent elements of the Russian Federation (76 per cent), and they now already include 39,224 individuals.

During his meeting with the first hundred members of the personnel reserve, the President of the Russian Federation drew particular attention to the need for leaders of the Administration of the President and of the Government of the Russian Federation to increase substantially the proportion of women in management.

Item 17

The Office of the Prosecutor General of the Russian Federation has summarized the results of a review of reports and criminal case investigations on crimes committed against journalists in 2008/first half of 2009.

The summary showed that in the period indicated, criminal proceedings were initiated in 37 constituent entities of the Russian Federation in 103 cases in which the victims were journalists, while at the same time in 46 regions no criminal proceedings in this category were initiated.

Regarding the 103 criminal cases, only in 14 did preliminary investigation agencies in eight constituent entities of the Russian Federation (Republics of Altai and Dagestan, Karachay-Cherkess Republic, Krasnodar krai, Moscow and Saratov oblasts, Khanty-Mansi Autonomous Okrug-Yugra and Moscow) put forward theories of a link between the crimes committed and the professional activity of the victims.

Several criminal cases were identified in which the victims were women journalists.

1. In Cherkessk on 22 December 2008, unidentified persons violently attacked the correspondent of the federal news agency "REGNUM", Zh. Ya. Akbasheva, warning her to stop disseminating information on the "REGNUM" news agency website about the activity of representatives of the republic's executive authorities. The crime has not been solved.

2. In Krasnodar, V. N Kovalchuk, L. S. Pozoyan and I. A. Shumeiko obstructed journalists from the intergovernmental TV and radio company "Krasnodar", M. I Zakhozhy, I. I. Kizilbasheva and V. I. Gritskovich, from making a video recording of a report on the circumstances surrounding a road traffic accident which had occurred, beating them and also seizing from the film crew a video cassette with the recorded material and damaging the video camera. A criminal case was taken to court on 16 March 2009.

3. In Kogalym, Khanty-Mansi Autonomous Okrug-Yugra, on 7 January 2008, in the drug unit of the town hospital, V. A. Baskhanov inflicted bodily injuries on and threatened to kill the editor of the

“Infoservis” TV company, I. Yu. Zabyalovaya, who was in the hospital in order to prepare a report. A criminal case was brought to court on 28 January 2009.

Analysis has shown that the vast majority of criminal acts committed against journalists in the period indicated were not connected with their professional activity. The insignificant number of criminal cases connected with obstructing the professional activity of journalists is evidence of the uncommon, isolated nature of this type of crime.

It should be noted that the crimes in the category under consideration have evoked a high degree of public response: the murders of Politkovskaya, Markelov and Baburova are ensured a high level of investigation.

The criminal proceedings into the murder of Novaya Gazeta reporter Anna Politkovskaya initiated on 7 October 2006 on grounds of a crime provided for under article 105 part 2 item b of the Criminal Code of the Russian Federation (“Murder”), is being investigated by the Main Investigative Directorate of the Investigative Committee attached to the Office of the Prosecutor General of the Russian Federation.

Criminal charges have been brought against those accused of having committed this crime, D. R. Makhmudov and I. R. Makhmudov, as accomplices, and R. R. Makhmudov, who was named in an international arrest warrant in March 2008, as the actual perpetrator of the killing, as well as one of the organizers of the crime, S. G. Khadzhikurbanov.

Criminal proceedings against S. G. Khadzhikurbanov and the Makhmudov brothers (D. R. Makhmudov and I. R. Makhmudov) were referred for examination to the jurisdiction of the Moscow District Military Court, which acquitted the accused by jury verdict on 20 February 2009.

The acquittal verdict was annulled by decision of the Military Collegium of the Supreme Court of the Russian Federation and the criminal case was referred for reconsideration.

At the present time, the Investigative Committee attached to the Office of the Prosecutor General of the Russian Federation is continuing its investigation of the criminal case against the person who ordered the murder of A. Politkovskaya and against the immediate perpetrator. Investigative operations are being carried out both within the territory of Russia and beyond its borders, with the involvement of law-enforcement agencies of European states. The period for preliminary investigations into the case has been extended to 7 February 2010.

Criminal proceedings into the murder of the lawyer S. Yu. Markelov and freelance correspondent for “Novaya Gazeta” A. E. Baburova were initiated on 19 January 2009 on grounds of crimes provided for under article 105, part 1, article 30 part 3 and article 105 part 2 item “a” of the Criminal Code of the Russian Federation.

The preliminary investigation established that Y. D. Khasis and other persons whose identity was not established by the investigation, acting as part of an organized group with N. A. Tikhonov, carrying out a shared intention of murdering S. Yu. Markelov and A. E. Baburova, came on 19 January 2009 to house No. 17/9, Prechistenka Street, Moscow, in which the lawyer was holding a press conference, and began carrying out their observation.

When S. Yu. Markelov and A. E. Baburova left the press centre building and headed along Oprechistenka Street toward Moscow’s “Kropotkinskaya” underground station, Khasis, coordinating the actions of Tikhonov, followed them on the opposite side of the street mentioned, communicated this to Tikhonov and gave the agreed signal.

At approximately 14.30 near No. 1, Prechistenka Street, Moscow, Tikhonov intentionally fired two shots at Markelov's head from an unidentified 7.65-mm calibre firearm and one shot at Baburova's head. Markelov's death from the wounds he received occurred at the scene of the crime, while Baburova died the same day at Moscow's municipal clinical hospital No. 1.

N. A. Tikhonov and Ye. D. Khasis were charged on 4 November 2009 under items "a" and "g" of part 2 of article 105 of the Criminal Code of the Russian Federation. By rulings of the Basmany District Court in Moscow of 5 November 2009, the aforementioned persons were remanded in custody.

New charges were brought against Tikhonov and Khasis on 16 and 21 December 2009 in accordance with items "a" and "g" of part 2 of article 105 and part 3 of article 222 of the Criminal Code of the Russian Federation. ("Illegal acquisition, transfer, sale, storage, transportation or bearing of firearms, their basic parts, ammunition, explosive substances and explosive devices").

The period of custody from 29 December 2009 has been extended by rulings of the Basmany District Court in Moscow to 5 months 15 days for N. A. Tikhonov and to 5 months 16 days for Y. D. Khasis, i.e. to 19 April 2010.

At the present time, active operational investigative measures are being pursued aimed at establishing the identity of other persons involved in the perpetration of the crime, and also at consolidating evidence gathered earlier. The preliminary investigation period has been extended to 19 April 2010.

Items 18-19

Issues of granting women the right of appointment to leadership positions (including in the field of education) are reflected in articles 1, 2 and 3 of the Report on the Implementation in the Russian Federation of the Elimination of All Forms of Discrimination against Women (combined sixth and seventh periodic report).

Relevant activity in this field is aimed at raising the professional standard of teaching personnel and the quality of teaching, introducing progressive mechanisms for shaping the earnings of teachers which will provide for their substantial growth while at the same time taking account of the results of teaching activity, moulding a new type of leader – an education manager, implementing an age-based staffing rotation attracting new personnel and keeping them in the education system etc., which in the long term must lead to equalization of the gender composition of teaching personnel.

Item 20

One of the fundamental principles of labour relations is the ban on discrimination at work and in employment, which is enshrined in the 1998 ILO Declaration on Fundamental Principles and Rights at Work. The ban on discrimination at work is aimed at according all citizens equal opportunities to develop their work competencies. Only the professional qualifications of a worker should be considered when a labour contract is concluded.

The principle of gender equality takes as its basis the preamble to the Universal Declaration of Human Rights, adopted by the General Assembly of the United Nations on 10 December 1948, article 3 of the International Covenant on Civil and Political Rights of 16 December 1966 and article 3 of the International Covenant on Economic, Social and Cultural Rights of 16 December 1966 and is developed in the Convention on the Elimination of All Forms of Discrimination against Women of 1979. The principle specified is proclaimed in the constitutions of various states, including that of the Russian Federation, and is enshrined in part 3 of article 19 of the Constitution of the Russian Federation.

No law on equality of opportunities at work has been adopted in the Russian Federation as an independent normative legal act. Provisions prohibiting discrimination in matters of recruitment, promotion, working conditions or dismissal, as well as containing requirements for equal pay for work of equal value and providing means of legal protection, are contained in the Constitution of the Russian Federation (articles 37, 46) and the Labour Code of the Russian Federation (articles 2, 3, section XIII).

In order to guarantee the rights of women and men to equal pay for work of equal value, both administrative and criminal liability are provided for (article 5.27 of the RF Code of Administrative Offences “Violation of labour laws and labour protection laws”, and article 136 of the RF Criminal Code “Violation of the equality of human and civil rights and freedoms”).

Every state must ensure observance of the principle of equal pay for men and women for equal work or work of equal value.

By “pay” is meant the basic or minimum wage or salary, as well as any other remuneration, in cash or in kind, which a worker receives directly or indirectly from an employer in connection with his/her work.

Owing to their physiological characteristics, women do not have equal opportunities with men to exercise certain of their rights, which predetermines the necessity for their additional legal protection. Particular attention is given to issues of ensuring gender equity in matters of recruitment, work activity and payment for work by the Charter of Fundamental Rights of the European Union of 7 December 2000.

The implementation of integrated state policy for improving the situation of women is one of the priority directions of state socio-economic policy.

In accordance with Decree No. 337 of the President of the Russian Federation of 4 March 1993 “On the priority objectives of state policy in relation to women”, the central agencies of the federal executive branch, the agencies of the executive branch of government of the republics which make up the Russian Federation, of the kraia, oblasts, autonomous entities, and of the cities of Moscow and St. Petersburg have been charged with tackling such priority objectives as:

- securing conditions for the genuine participation of women in the activity of state agencies and public organizations and in the shaping and implementation of state policy at all levels;

- establishing organizational, economic and legal guarantees for the implementation of women’s right to work;

- securing the ability of women to compete on the labour market by extending their training to encompass new professions and entrepreneurial activity, bridging the gap in the level of qualifications and pay of women workers, organizing retraining and improving the qualifications of women who have breaks in employment in connection with the birth of their children and caring for them;

- gradually bridging the gap in pay which has developed historically in branches of the economy employing predominantly women;

- securing the right of women to occupational safety and to protection of their life and health, taking into account their role as mothers;

- providing the social guarantees for working women provided for under existing legislation, irrespective of the form of ownership of enterprises, institutions and organizations, including upon their elimination or reorganization;

organizing and developing social services which allow parents to combine fulfilling their parental obligations with professional and voluntary work, among other things by maintaining and expanding the network of childcare institutions.

In accordance with current legislation, state labour inspectorates in constituent entities of the Russian Federation conducted 2,911 inspections over a nine-month period in 2009 for the purposes of carrying out supervision and monitoring of compliance with legislation on the employment of women, during the course of which 10,983 violations of labour laws were detected and rectified.

Analysis of the results conducted by state labour inspectorates in constituent entities of the Russian Federation confirms that the problem of ensuring observance and protection of the labour rights of working women remains quite acute, and violations of the requirements of special legal rules linked to securing the labour rights of women in organizations, mainly those engaged in non-governmental types of economic activity, are very widespread, which is often one of the causes of unsatisfactory working conditions.

The most common violations of labour legislation for women which were identified in the course of the inspections were as follows:

- non-payment of state social insurance benefits during leave to care for a child (article 255 of the Labour Code of the Russian Federation);
- involvement of women who have children under three years of age and of workers who have children with disabilities up to the age of eighteen years in overtime work or in work during the night, on days off or on public holidays without written consent and medical recommendations (article 259 of the Labour Code of the Russian Federation);
- violation of the established procedure for the recruitment of women (absence of written employment contract, failure to issue a recruitment order) (articles 67 and 68 of the Labour Code of the Russian Federation);
- violation of the procedure for annulling employment contracts and imposing disciplinary penalties and making payments in accordance with labour legislation (articles 77, 140 and 193 of the Labour Code of the Russian Federation);
- refusal to provide additional paid leave from work in harmful and (or) dangerous working conditions or provision of leave of shorter duration than that specified by the list of industries, plants, professions and jobs with harmful working conditions, employment in which gives entitlement to additional leave and a shortened working day;
- violation of the norms specifying the maximum allowable loads for women to lift and carry manually, which were established by Resolution No. 105 of the Government of the Russian Federation of 6 February 1993 (part 3 of article 253 of the Labour Code of the Russian Federation);
- violation of the work and rest routine, including the requirements of article 320 of the Labour Code of the Russian Federation on the establishment of a 36-hour working week.
- in many organization using women's labour, no workplace assessment of working conditions has been carried out, nor have the working conditions necessary for women been put in place (article 212 of the Labour Code of the Russian Federation).

Recently, appeals from pregnant women and women who have children under three years of age on matters relating to violation of the requirements of articles 255 and 256 of the Labour Code of the

Russian Federation, article 13 of the Federal Law of the Russian Federation “On state benefits for citizens who have children” and article 15 of the Federal Law No. 255-FZ of 29 December 2006 “On the provision of temporary incapacity, pregnancy and childbirth benefits for citizens liable for compulsory social insurance” have become more frequent. Checks are made of the facts in each case, and the violations rectified.

Item 21

The use of flexible forms of employment, including teleworking, the establishment of part-time work and flexitime, is regulated by labour legislation and other normative legal acts containing labour law regulations.

The work of teleworkers is regulated by the Labour Code of the Russian Federation, and by Resolution No. 275/17-99 of the USSR State Committee for Labour and Social Affairs and the Secretariat of the All-Union Central Council of Trade Unions of 29 September 1981 “On adoption of a provision on the working conditions of teleworkers,” insofar as it does not conflict with the Labour Code of the Russian Federation and other acts containing labour law regulations, with special features established by the Labour Code of the Russian Federation. The work of teleworkers is also regulated by trade standards, collective agreements and employment contracts.

Teleworkers are deemed to be persons who have concluded an employment contract on performing work at home using materials, tools and mechanisms allocated by the employer or purchased by the teleworker at his/her own expense. A teleworker may perform work stipulated under an employment contract with the assistance of members of his/her family. Where this is done, no employment relationship arises between members of the teleworker’s family and the employer (part 1 of article 312 of the Labour Code of the Russian Federation).

The work of teleworkers is generally targeted at the production of consumer goods and the provision of particular types of services for citizens and companies. The management of such companies may also use the work of teleworkers for producing (performing) other types of goods (tasks) if, based on the nature and technology of the production, this is possible under home conditions and is economically worthwhile.

The priority right to conclude an employment contract for work at home is given to women who have children aged up to 15 years.

The validity of labour legislation and of other acts containing labour law regulations, including guarantees of payment for a period of temporary incapacity and of leave, extends to teleworkers.

An employer must provide safe working conditions (use of means of personal protection, observance of a work-rest routine, training in safe methods and procedures for the performance of work, checking knowledge of occupational safety requirements, etc.).

Under article 312 of the Labour Code of the Russian Federation, an employment contract with a teleworker may be terminated on grounds provided for by the employment contract (for example, production of defective products, lack of orders or raw materials).

According to the quarterly data provided by the state labour inspectorates in the constituent constituent entities of the Russian Federation, no violations of the labour rights of workers working at home were detected during the implementation of inspection and monitoring measures in 2009.

The development of flexible forms of employment which allow a high degree of freedom to operate and independence coupled with significantly less (compared with standard traditional

employment) external regulation in the organization of labour and production is one of the conditions for broadening the employment options of women combining professional duties and family obligations.

Flexible forms of employment may be realized in the shape of employment connected with the organization of independent activity by a citizen, employment at workplaces with part-time hours and a rolling schedule/flexible working hours, and teleworking.

For workers whose working schedule differs from the general rules established by a given employer, the duration of the working week and of a day's work (shift), the time for starting and finishing work, the time for breaks during work, the number of shifts per day, and the rotation of work days and non-work days are established by the employment contract (article 100 of the Labour Code of the Russian Federation).

Based on the results of a survey of the registered labour market in the first half of 2008, the proportion of vacancies for flexible forms of employment lay within the range of 2.6-4.0 per cent of the total number of vacancies filed with the employment service agencies.

At the same time, vacancies providing teleworking employment accounted for less than 1 per cent.

In order to assess the status of flexible forms of employment in 70 constituent entities of the Russian Federation, a sample survey of employers and of persons providing care for children with disabilities was conducted, the results of which indicate negligible use by employers of part-time work schedules and of teleworking for particular categories of workers, including for women raising children with disabilities.

The proportion of workers employed in flexible forms, including teleworking, does not exceed 2 per cent of the total number of employees, and in a number of the constituent entities of the Russian Federation stands at less than 0.1 per cent.

Thus, in Primorsky krai it measures 1.7 per cent, in Volgograd and Irkutsk oblasts 0.8 per cent, in the Jewish autonomous oblast 0.6 per cent, in Novosibirsk oblast 0.5 per cent, in the Republic of Bashkortostan and Tomsk oblast 0.4 per cent, in Tyumen oblast 0.37 per cent, in Ivanovo and Yaroslavl oblasts and in the Udmurt Republic 0.2 per cent, in Krasnoyarsk krai 0.06 per cent, and in Astrakhan and Saratov oblasts 0.02 per cent.

Flexible forms of employment for women are used primarily in the following sectors of economic activity:

- retail trade;
- hotels and restaurants;
- transport and communications (predominantly in communications);
- real estate operations, rental and provision of services;
- education;
- health care;
- provision of communal, social and personal services.

Flexible forms of employment for women have also become widespread in social services.

Teleworking is predominantly used in trade, communications and transport.

In certain constituent entities of the Russian Federation (Belgorod, Ivanovo, Kaluga, Smolensk, Sverdlovsk and Novosibirsk oblasts, and the Kabardino-Balkar Republic) matters pertaining to the use of flexible forms of employment, including teleworking, are regulated by the laws of the constituent entities of the Russian Federation, and integrated action plans are being drawn up to support the development of flexible forms of employment.

The greatest demand for the forms of employment mentioned is among women raising children with disabilities.

Registers of persons caring for children with disabilities and of their needs for state services in the areas of health care, education, employment and social protection are organized and maintained in the constituent entities of the Russian Federation.

In accordance with legislation on employment, executive agencies of the constituent entities of the Russian Federation exercising devolved powers in the area of employment promotion organize and maintain registers of the recipients of government services with regard to employment, which also contain information on women raising children with disabilities.

Social protection, health care and education agencies of the constituent entities of the Russian Federation maintain records of children with disabilities which make it possible to identify and meet the requirements of families, including women, with respect to the relevant types of services. At the same time, many of the constituent entities of the Russian Federation are setting up electronic systems for keeping records of children with disabilities (Chuvash Republic, Pskov, Nizhny Novgorod and Saratov oblasts and others).

In the majority of the constituent entities of the Russian Federation, measures for developing flexible forms of employment are being put into effect as part of the implementation of federal target programmes “Children of Russia” (sub-programme “Family and Children”, focal area “Families with children with disabilities”) and “Social support for the disabled for the period 2006-2010”, regional programmes adopted in constituent entities of the Russian Federation to build on the federal target programmes and special normative legal acts of the constituent entities of the Russian Federation on matters relating to social protection for citizens, including women, who have children with disabilities and for children with disabilities.

For example, in the Republic of Karelia the regional target programme “Children of Karelia for the period 2008-2011” includes a focal area “Families with children with disabilities”, with provision for solving problems including those of broadening the range and raising the quality of services provided for families with children with disabilities, ensuring the geographical accessibility of social services for children with special needs and developing support mechanisms for families with children with disabilities unable to take care of themselves.

In Novgorod oblast, measures to develop flexible forms of employment are being implemented as part of the oblast’s target programme “Development of a system of social protection for the population of Novgorod oblast for the period 2009-2012” and the oblast’s target programme “Children with special health needs and children with disabilities for the period 2009-2011”.

In Chelyabinsk oblast, additions have been incorporated in the list of measures of the oblast’s target programme “Social support for the disabled in Chelyabinsk oblast” for the period 2007-2010, stipulating a range of measures to develop flexible forms of employment (conducting a survey of persons caring for children with disabilities, organizing training in rehabilitation methods for these persons).

In Sverdlovsk oblast, as part of a public-private partnership to develop flexible forms of employment and provide rehabilitation services for people caring for children with disabilities, work is being carried out with families raising children with special needs in the vocational rehabilitation division of the state regional social services institute, the “Talisman Rehabilitation Centre for Children and Teenagers” (Ekaterinburg). During the summer, the institute collaborates with a private entrepreneur, the owner of a gift shop, in providing home-based work for older teenagers and mothers of children with special needs.

As part of the work of the boards of trustees of institutions, one of the measures for assisting families is the recruitment of people caring for children with disabilities. Representatives of a number of sponsoring organizations have expressed their willingness to recruit parents raising a child with disabilities. The provisions of a trilateral agreement for the region for 2009-2010 include obligations upon employers to include in collective agreements provisions for introducing variable (flexible) working hours at the request of a pregnant woman or one of the parents (guardian) of an infant (child with disabilities up to the age of 18 years) where the production/work process allows this.

Item 22

See table 22 of statistical annex 1.

For Russian women, a high level of involvement in economic activity is the norm. As early as the 1960s, economic activity among women was comparable with that among men — more than 80 per cent of women of working age worked. In the transitional period, economic activity among women of working age has declined, but not too drastically, (from 81.6 to 74.7 per cent), and the rates of decline have been comparable with the changes in the activity of men of the same age (from 86.6 to 78.9 per cent).

The greatest decrease in activity fell within the early, and most recessionary, years of the 1990s. The speed of growth in economic activity from 1999 onward was approximately equal for both sexes, with no gender discrimination.

If changes in the economic activity of women are compared across a wider age range — from 15 to 72 years using ILO methodology, then the decline of the recessionary years has almost been made up (63.7 per cent in 1992 and 61.6 per cent in 2005), especially in comparison with men of the same age (77.6 per cent and 71.4 per cent in the same years). Women have not only maintained a high level of economic activity but have substantially widened the age range for such activity into old age. Since the middle of the decade between 2000 and now the situation has stabilized and the indicators of economic activity have remained practically unchanged.

The position of women on the labour market is determined by demand in the economy for workers of a given socio-demographic group. This demand is conditional upon the competitiveness of female labour, the level of qualifications, the ability to switch jobs or professions and the terms of employment required as well as the system of social protection in the respective field of work.

In this respect, the greatest recruitment difficulties are experienced by women aged 16-29 years (about 72 per cent of mothers give birth to their children when they are in this age category).

Consequently, the main problems in advancing the employment of women are due to the difficulties of combining work and parenthood.

In the Russian Federation, the legal, economic and organizational foundations of state policy to promote employment in the population, including state guarantees with regard to implementation of the

constitutional rights of citizens of the Russian Federation, including women, to work and to social protection from unemployment are determined by the Law of the Russian Federation "On employment in the Russian Federation" (hereinafter, the Employment Act). Such guarantees as the provision by the employment service agencies of free advice and free information and services related to vocational guidance for the purpose of choosing a line of work (an occupation), recruitment and vocational training opportunities are extended to citizens looking for work, including citizens with family obligations (including those from low-income and large families and single-parent families), and pregnant women, irrespective of whether under established procedures they are considered unemployed or not.

Under item 2 of article 5 of the Employment Act, state policy with regard to assisting people into employment is aimed at securing equal opportunities for all citizens, regardless of gender and other factors, and at implementing measures facilitating the employment of persons experiencing difficulties finding a job, including single parents and parents of large families who are raising children of minority age or children with disabilities (in the Russian Federation, these are mainly women). Additional employment guarantees for this category of citizens are provided through the development and implementation of programmes to promote employment and to create additional jobs and specialized organizations.

Women made up over 50 per cent of the citizens who received state employment assistance services in the period January-September 2009 . Included as part of the provision of state services was the organization of:

vocational guidance for the purpose of choosing a line of work (an occupation), recruitment and vocational training for 1,581,900 women, constituting 53.8 per cent of the total number of recipients of the service;

psychological support for 106,600 women (64.5 per cent);

professional development, retraining and skills upgrading for 187,600 women (54.0 per cent);

paid social work for 443,900 women (49.7 per cent);

temporary recruitment for 448,900 women (falling within the category of those experiencing difficulties finding work, aged from 14 to 18 years, and aged from 18 to 20 years among leavers of primary and secondary educational institutions looking for work for the first time) (50.2 per cent);

social adaptation for 113,500 women (67.0 per cent);

assistance with self-employment for 73,100 women (50.0 per cent).

As of 1 October 2009, more than 1,577,100 unemployed women had been removed from the figures of those registered as unemployed, including:

753,200 in connection with recruitment to a new job with the assistance of the employment service agencies;

167,600 in connection with undergoing vocational training under the direction of the agencies in question;

67,300 in connection with the granting of a work-related pension, including a pension granted prematurely on the proposal of the employment service agencies.

As at 1 October 2009, 963,200 unemployed women were recipients of welfare payments, including unemployment benefits. Those who find themselves in the most difficult position on the

labour market are the least protected categories of women – women with infants or children with disabilities, single mothers, women graduating from educational institutions, wives of servicemen living in military bases and women living in rural areas.

Item 23

In July 2007, a Federal Law “On the development of small and medium-sized enterprises in the Russian Federation” was adopted. During work on the text of this federal law, the criteria for defining the sector were brought as closely in line as possible with the criteria established in the Recommendation of the European Commission of 6 May 2003 concerning the definition of micro, small and medium-sized enterprises 2003-361-EC. This included the use of three basic conditions for recognizing a company as small or medium-sized:

the criterion of “autonomy” of the company, as the main element determining in many ways its market behaviour and stimulating the development of competition. This principle establishes, for the purposes of defining the status of a small and medium-sized business entity, a maximum limit on holdings of the Russian Federation, the constituent entities of the Russian Federation, municipal entities, foreign legal persons, foreign citizens, social and religious organizations in the nominal capital of companies of 25 per cent;

a threshold in terms of the number of employees in the company: up to 15 for microenterprises; from 16 to 100 for small enterprises; and from 101 to 250 for medium-sized enterprises;

a threshold in terms of the annual turnover of the company: up to 60 million roubles for microenterprises; up to 400 million roubles for small enterprises; and up to 1,000 million roubles for medium-sized enterprises. (The data is indicated net of value added tax.)

The federal law mentioned above enshrines the following principles of support for small and medium-sized business enterprises:

equal access for small and medium-sized business enterprises meeting the criteria provided for by federal development programmes for small and medium-sized business enterprises, regional development programmes for small and medium-sized business enterprises and municipal development programmes for small and medium-sized business enterprises, to participate in the relevant programmes;

provision of support subject to compliance with the requirements established by law concerning the protection of competition;

transparency of procedures for the provision of support.

One of the main elements of support for small and medium-sized enterprise is the programme of financial support which is being implemented using federal budgetary funds, budgetary funds of the constituent entities of the Russian Federation and local budgetary funds.

The Ministry of Economic Development of the Russian Federation has since 2005 been the federal agency authorized to provide such support out of federal budgetary funds.

Under the federal financial support programme, a package of measures is being implemented aimed at, among other things:

(a) the establishment and development of an infrastructure for supporting small business enterprises (business incubators);

- (b) support for small business enterprises producing and selling goods (labour, services), designed for export;
- (c) the development of a system for extending credit to small business enterprises;
- (d) the establishment and development of an infrastructure for supporting small companies in the field of science and technology;
- (e) support for regional small enterprise development programmes of the constituent entities of the Russian Federation.

In 2009, the size of the funds allocated for government support of small enterprise out of the federal budget was 18.6 billion roubles. In 2010, the programme is being financed to the tune of 11 billion roubles.

Federal budget funds are provided by the Ministry of Economic Development of the Russian Federation on a competitive basis in the form of grants to the budgets of the constituent entities of the Russian Federation in return for the co-financing of expenditure out of funds under the relevant budgets.

Grants to a constituent entity of the Russian Federation for the financing of measures to support and develop small enterprises are provided in accordance with the programme for the support and development of small enterprises approved by it and taking into account the principles for the provision of support set out above.

In the Russian Federation, equal and open access to the facilities, preferential tariffs and discounts provided to small and medium-sized business enterprises under governmental and municipal support programmes is thus guaranteed at the legislative level for women engaging in entrepreneurial activity or planning to open their own business.

Regional programmes of support for small enterprises, which include special sections for supporting female entrepreneurship, are being established in the constituent entities of the Russian Federation.

A special programme entitled the “Women’s Entrepreneurship Centre” is running in Leningrad oblast, and the priorities of Leningrad oblast Law No. 36-OZ “On the development of small and medium-sized enterprise in Leningrad oblast” of 30 April 2009 include support for women’s resource centres. The small-enterprise support programmes of Kurgan, Nizhny Novgorod, Sakhalin, Sverdlovsk and Chelyabinsk oblasts and of the Kabardino-Balkar Republic and the Republic of Sakha (Yakutiya) include support for women’s entrepreneurship. Many regions of Russia hold an annual “Woman director of the year” competition.

Item 24

Crimes against the sexual inviolability and sexual freedom of the individual have been enshrined in law in Chapter 18 of the Criminal Code of the Russian Federation. In addition to rape, liability has been established for any other violent acts of a sexual nature (article 132 of the Criminal Code of the Russian Federation) and for coercion to perform acts of a sexual nature by exploiting the material or other dependence of the victim (article 133 of the Criminal Code of the Russian Federation), which are usually dealt with as sexual harassment of women in the workplace.

Article 133 of the Criminal Code of the Russian Federation includes under coercion to perform acts of a sexual nature coercion of a person to enter into sexual relations, to commit a homosexual or

lesbian act or to commit other acts of a sexual nature by means of blackmail, the threat of destruction, damage or removal of property or by exploiting the material or other dependence of the victim.

The phrase “other dependence” referred to in the wording of article 133 of the Criminal Code of the Russian Federation should be understood to mean, first and foremost, work-related dependence (dependence at work), dependence on a representative of authority and dependence of a patient on a person providing medical assistance. The essential thing in this case is the existence of a dependence on a particular person by reason of the office or regulated social status held by him.

No other ways of influencing the will of the victim in order to induce him/her to perform acts of a sexual nature are criminalized in article 133 of the Criminal Code.

The crime is punishable by a fine of up to 120,000 roubles or the equivalent of the wages or other income of the convicted person for a period of up to one year or by corrective labour for a term of up to two years or by deprivation of liberty for a term of up to one year.

The statutory regulations on “coercion” have a nearly 100-year history (they first appeared in the Criminal Code of the Russian Federation in 1922), reflecting the long pathway of legislative evolution, from a crime infringing upon the sexual freedom exclusively of women to a norm guaranteeing to an equal extent the sexual freedom of both males and females.

In the case of coercion, a person enters into sexual relations involuntarily, being under pressure. Such a situation makes it difficult for the victim but does not deprive the victim of the ability to choose an action, does not place him/her in an inextricable situation as in the case of rape. Coercion is differentiated from seduction to commit sexual acts, one variation of which is a promise of various privileges and benefits (for example, a promise of marriage, of promotion in office or of a travel invitation). In this case, the consent to enter into sexual relations is based on a personal choice of the victim in expectation of the promised benefits. Under such circumstances, the person is not considered a victim.

Item 25

According to data from the Ministry of Health and Social Development of the Russian Federation, in 2008 the number of women of fertile age using modern contraceptives (intrauterine devices and hormonal contraceptives) stood at 5 million. The number of women using hormonal contraception methods stood at 4.12 million.

The financing of the procurement of contraceptives is being implemented as part of territorial programmes of state guarantees to provide citizens with free medical care for the relevant year.

One of the most important lines being pursued in increasing fertility is the systematic work being carried out to lower the number of abortions.

The total number of abortions fell from 1,675,700 in 2005 to 1,385,600 in 2008; the figure for abortions per 1,000 women of fertile age decreased from 10.3 in 2005 to 9.0 in 2008, and the figure for abortions per 100 births from 117.4 to 81.1, correspondingly. Since 2005, the number of births in the Russian Federation has thus exceeded the number of abortions.

A positive change has been recorded in the fall in the number of abortions in primigravid women (from 161.5 in 2005 to 136.8 in 2008). The number of abortions in girls up to 14 years of age decreased from 1.0 in 2005 to 0.9 in 2008, and in the age group 15-19 years, it was down from 165.7 in 2005 to 124.6 in 2008.

The fall in the number of abortions is contributing to a decrease in the incidence of gynaecological diseases, a reduction in maternal mortality after termination of pregnancy and an improvement in reproductive potential.

Occupying a special place in the work on preventing abortions are women's clinics which are the primary link for obstetric/gynaecological care, very accessible to the population and closely linked to the activity of many medical and preventive treatment facilities and specialists.

For the purpose of developing social and psychological care for women, Order No. 389 of the Ministry of Health and Social Development of the Russian Federation of 1 June 2007 approved a provision concerning organization of medical and social care consultancy work of a women's clinic and provided for the introduction of posts for social workers and psychologists in women's clinics. The main functions of social workers and psychologists in women's clinics are to provide medical and social home support to families, to provide medical and psychological support and social and legal assistance to women, to provide medical and psychological support to minors to prepare them for family life, to implement measures to prevent pregnancy terminations, to raise awareness among women of the need to carry a pregnancy to term, to provide further support during pregnancy and to carry out work to shape stable ideas of a healthy lifestyle.

The implementation of this order is allowing measures to be carried out more effectively on preventing abortions, especially among socially disadvantaged women, to identify social risk factors for women, to address early on the issue of the possibility of a pregnancy being carried to term and to optimize measures focused on protecting the reproductive health of women in the Russian Federation.

In recent years, great advances in the treatment of devastating extragenital diseases have been made in the Russian Federation. In this regard, Order No. 736 of the Ministry of Health and Social Development of the Russian Federation of 3 December 2007 established a new list of medical indications for the artificial termination of a pregnancy, from which more than 70 entries relating to diseases which had previously been contraindications to the maintenance of a pregnancy were excluded.

In order to prevent and reduce the number of complications following induced termination of pregnancy and to protect the reproductive health of women in the Russian Federation, Order No. 335 of the Ministry of Health and Social Development of the Russian Federation of 17 May 2007 established a recommended model of informed voluntary consent to an induced termination of pregnancy being carried out in the period up to 12 weeks.

The "Give me life" campaign, which was run in all the constituent entities of the Russian Federation in 2009, jointly by the Ministry of Health and Social Development of the Russian Federation and the Foundation for Social and Cultural Initiatives, served to raise people's awareness of contraceptives.

Women's clinics, gynaecology departments, family planning and reproduction centres, and day patient facilities held sets of lectures by specialists on methods of preventing unwanted pregnancy and on sexual behaviour.

Leading specialists in the field of obstetrics and gynaecology and family psychologists have spoken in the mass media, on television and on the radio on issues of hygiene training, promoting a healthy lifestyle, and family values.

Taking part in the campaign were health care management agencies, committees on sport, tourism and youth policy and on family affairs, demographic and social policy, departments of science and education, the management of civil registry offices, and social organizations.

See annex 1 (tables 38-41, 45).

Item 26

Under current legislation of the Russian Federation, the state guarantees the inclusion in the curricula of educational institutions of topical issues concerning moral and sex education (Federal Law No. 38-FZ “On prevention of the spread in the Russian Federation of disease caused by the human immunodeficiency virus (HIV infection)” of 24 February 1995. Responsibility for the implementation of said guarantee rests with the federal executive agencies, the executive agencies of the constituent entities of the Russian Federation and local self-government agencies in accordance with their competence.

Educational institutions are tackling the issue of sex education for schoolchildren by integrating it within moral and hygiene education, both within the framework of many school subjects and during extra-curricular periods.

Issues relating to sex are by their nature interdisciplinary, and their study is based on biological and medical, social and cultural and psychological and pedagogical studies.

Under the laws of the Russian Federation, issues of reproductive health are included in federal state educational standards and in model basic curricula for the school subjects “Biology”, “Fundamentals of health and safety” and “Physical culture”.

Syllabuses for the subject “Fundamentals of health and safety” provide for the study of such topics as “Reproductive health”, “Morals and health”, “Legal aspects of relations between the sexes”, “Reproductive health and socio-demographic processes in Russia”, “Family, basic functions of the family and human health”, “Fundamentals of family law in the Russian Federation”.

A new generation of federal state educational standards is currently being developed. At this stage, the federal state standard for primary general education has already been developed and adopted by Order No. 373 of the Ministry of Education and Science of the Russian Federation of 6 October 2009.

The standard indicated is based upon a systems/activities approach which involves the education and development of personal qualities which will meet the requirements of the information society and the innovation economy, and the recording of pupils’ individual age-specific, psychological and physiological characteristics, including gender characteristics.

In accordance with the requirements for the structure of the basic primary general education curriculum, an integral component of this document, alongside other sections, is a programme for fostering the cultivation of a healthy and safe lifestyle, which must provide for the development in the pupils of knowledge, attitudes, personal reference points and norms of behaviour that will ensure that they maintain and strengthen their physical, psychological and social health during the stage of primary general education as one of the most valuable elements of the person.

For the first time, as part of the work on the new standards, a draft Model Programme for the Spiritual and Moral Development and Personal Education of the Russian Citizen has been prepared. One of the objectives of this programme is to shape in pupils a culture of a healthy and safe lifestyle, including ideas on the mutual dependence of a person’s physical, moral and social and psychological health, and on the importance of morals and ethics in preserving a person’s health.

The foundations of the moral, physical and intellectual development of a child's personality lie chiefly in the family. The interaction of family and school in this regard is a prime component in the work of the pedagogical teams of educational institutions.

Specialists from the practical educational psychology service – educational psychologists in schools and educational institutions for children who need psychological and pedagogical and medical and social assistance provide integrated multidisciplinary assistance to pupils who are living in difficult situations, undertake the rehabilitation of children and juveniles who have been subject to various forms of psychological and physical abuse, and implement psychological and pedagogical programmes for schoolchildren and their parents on developing a culture of dialogue, health, family relations and respect for women.

In the education system today there are more than 700 educational institutions for children needing psychological and pedagogical and medical and social assistance. Every year, they provide integrated multidisciplinary assistance to more than 2 million children and juveniles aged from 3 to 18 years and to their parents (legal representatives).

For example, at the Khabarovsk Centre for Psychological and Pedagogical Rehabilitation and Correction, unique experience has been gained in the rehabilitation and social integration of children with high levels of criminality in the conditions of an open educational institution. Over the 17 years of the Centre's work, 42 girls below the age of 18 years who have been pregnant have carried their pregnancies to term with psychological and pedagogical support from workers at the Centre. Furthermore, not one of them rejected the child they gave birth to, despite the fact that many of them had in early childhood themselves experienced rejection by their own mothers.

The shaping in adolescents of a culture of interpersonal relations (including respect for the principles of the social equality of men and women) and of a responsible attitude toward their own health, and the shift of emphasis toward the spiritual and moral component in the education and teaching of schoolchildren and their preparation for future family life are to be included as priority areas of education psychology work in the education system. In order to provide syllabus and methodological support for the work of teachers, a national competition will be held in 2010 for educational psychology programmes relating to education and the shaping of a healthy lifestyle. The best works will be included in a collection of educational psychology programmes to be recommended by the Ministry for use by educational institutions in their practical work.

Item 27

In accordance with Resolution No. 858 of the Government of the Russian Federation of 3 December 2002 "On the federal target programme "Social development of rural areas up to 2012", by 'rural area' is meant rural settlements or rural settlements and inter-settlement territories linking the overall territory within the boundaries of a municipal district, as well as rural localities and workers' settlements forming part of urban settlements or urban districts, within the territory of which activity connected with the production and processing of agricultural produce predominates. The listing of such rural localities and workers' settlements in the territory of a constituent entity of the Russian Federation is determined by the highest executive government agency of the constituent entity of the Russian Federation.

For women working in a rural area, additional guarantees have been established with regard to the provision, upon their request in writing, of one additional day off per month without pay (article 262 of the Labour Code of the Russian Federation), as well as, under Resolution No. 298/3-1 of the Supreme Soviet of the RSFSR of 1 November 1990 "On urgent measures to improve the situation of

women and families and to protect maternity and childhood in rural areas”, the establishment of a 36-hour working week, unless a shorter duration of working week is provided for by other legislative acts.

Also, workers working in rural areas (including women) occupying posts in educational, cultural and medical institutions are given a supplemental payment for working in a rural area.

In order to protect the health of women, it is prohibited:

to recruit women aged up to 35 years to carry out operations in arable farming, livestock farming, poultry farming and fur farming using toxic chemicals, pesticides or disinfectants;

to use the labour of pregnant women in crop farming and livestock farming from the moment of detection of the pregnancy;

to train and employ women as tractor/engine drivers and drivers of goods vehicles;

to use the labour of women of childbearing age in industries, professions and jobs with difficult and harmful conditions.

Maximum permissible limits on loads for women have also been established, taking into account their age, for lifting and carrying loads manually (Resolution No. 105 of the Council of Ministers of the Russian Federation of 6 February 1993 “On new standards on maximum permissible loads for women when lifting and carrying loads manually”).

At the present time, several policy documents of the Government of the Russian Federation which relate to issues of the socio-economic development of the country are in force:

- Concept for the long-term socio-economic development of the Russian Federation for the period up to 2020 (adopted by Order of the Government of the Russian Federation No. 1662-r of 17 November 2008),
- Main directions of activity of the Government of the Russian Federation for the period up to 2012 (adopted by Order No. 1663-r of the Government of the Russian Federation of 17 November 2008), containing measures for additionally stimulating the participation of women in labour activity, while allowing for supporting the birth rate.
- Furthermore, by instruction of the Government of the Russian Federation a package of measures is being implemented aimed at providing protection of maternity and childhood and social support for women and persons with family obligations for the period 2008-2010, as part of which measures are provided for increasing the effectiveness of measures to protect the reproductive health of the population and improve the situation of women and workers with family obligations in the socio-economic field. The main measures of said package of measures are being implemented in the constituent entities of the Russian Federation within the framework of agreements between trade unions, employers and government agencies.

The strategic goal for the government is to attain a high level of economic and social development, which will reliably ensure national security and implementation of the constitutional rights of citizens.

The attainment of this goal signifies the development of a future Russia of a qualitatively new kind by the end of the next decade, the development of a society based on trust and responsibility, including the trust of the population in governmental and private economic institutions.

In accordance with this declared goal, work is being carried out on securing equal opportunities for the social mobility of talented representatives of all strata of society, on implementing social policy

to support vulnerable strata of the population, also including women, and on doubling the proportion of the middle class, a significant portion of which is formed by people engaged in creating the new economy based on knowledge and technology and in ensuring the development of mankind itself.

In order to improve the quality and accessibility of the delivery of medical care both to urban and rural women during pregnancy and childbirth, to establish conditions for the birth of healthy children, to expand preventive measures, to improve the follow-up care for children during the first year of life and to reduce maternal and infant morbidity and mortality rates, a “Birth certification” programme has been being implemented in the Russian Federation since 2006.

The programme is an important financial support measure for state and municipal healthcare institutions (both urban and rural), enabling additional financial resources to be attracted into the obstetric care system.

Funds received by healthcare institutions under the “Birth certification” programme are aimed at increasing the wages of medical personnel providing medical assistance services for women during pregnancy and childbirth and follow-up care services for children in the first year of life, as well as at the procurement of drugs, essential medical equipment, instruments, soft inventory and medical devices, which enable firstly improvement in the quality of medical care provision and secondly modernization of obstetric care institutions in urban and rural areas.

Thanks to the additional financial provision, the material and technical resources of obstetric care institutions have improved, including in rural districts. Women’s clinics, maternity hospitals (departments) and perinatal centres have purchased modern medical equipment, which has substantially broadened the scope for diagnosing complications during pregnancy and labour and for assessing the condition of the foetus.

Using the funds for birth certification, drugs for supporting women during pregnancy and during labour are being purchased, as well as expensive, life-saving medications for the resuscitation and care of neonates.

Improvement in the quality and accessibility of medical assistance for women in rural areas has made it possible to achieve a reduction in the maternal mortality rate among the rural population. In 2005, the maternal mortality rate among inhabitants of rural areas (31.4 per 100,000 live births) was 1.4 times higher than the corresponding rate among the urban population. In 2008, the maternal mortality rates among the inhabitants of rural areas (20.8 per 100,000 live births) and urban settlements (20.6 per 100,000 live births) were almost equal, which is evidence of the increase in the effectiveness of medical care provision in rural areas.

In order to improve the quality and accessibility of medical care provision to urban and rural pregnant women, women in labour, new mothers and new-born children and to lower maternal, perinatal and infant mortality, Order No. 1734-r of the Government of the Russian Federation of 4 December 2007 carries into effect in the 2008-2010 period the financing of the design, construction and equipping of two federal perinatal centres, as well as the co-financing from the federal budget of the construction and equipping of 19 oblast/krai/republic-level perinatal centres and the equipping of a further three in 22 constituent entities of the Russian Federation.

A total of 19 billion roubles has been provided for these purposes, including 5.9 billion roubles allocated from the federal budget in 2008 and 7.168 billion roubles in 2009.

In September 2009 a regional perinatal centre was brought on stream in Kaliningrad and in November 2009 a neonatal unit opened at the regional perinatal centre in Irkutsk.

Design specifications and estimates have been drawn up and approved and site construction and installation work is being carried out in 19 constituent entities of the Russian Federation. 18 perinatal centres are scheduled to be brought on stream in 2010 and one in 2011.

Based upon the combined efforts of various specialists and the introduction of effective perinatal treatment and diagnostic technologies, conditions are being established at the perinatal centres, which are equipped with modern medical apparatus, for the provision of a whole range of specialist medical care, including inpatient and outreach consultative and diagnostic care by visiting teams of anaesthetic, intensive care, obstetric and neonatal specialists, etc., which is leading to an improvement in the quality of medical care provision.

Order No. 808n of the Ministry of Health and Social Development of the Russian Federation of 2 October, under which procedures have been approved for the provision of obstetric and gynaecological care, is aimed at increasing the accessibility and improving the quality of medical care. It regulates stages in the provision of medical care, defines the indicators for hospitalization in the various levels of healthcare institutions, including for emergencies during pregnancy, childbirth and the postnatal period. The procedures indicated are aimed at improving the organization of medical care for women during pregnancy, childbirth and the postnatal period, as well as for women with gynaecological diseases, which will ensure for the population of the Russian Federation continuity and quality of medical care at all stages of its provision.

Item 28

See item 4.

In the Russian Federation, an integral system of normative legal acts has been created with the aim of guaranteeing the rights of national minorities. The principal elements of Russia's legal system are the international obligations of the Russian Federation, the Constitution of the Russian Federation, federal laws providing for preservation of the culture of national minorities, support for the language and national press and measures to counter the incitement of racial and religious hatred and extremist activity.

Thus, the Framework Convention for the Protection of National Minorities forms part of the legal system of Russia and pursuant to article 15 of the Constitution of the Russian Federation has direct effect. The Russian courts are entitled to apply the provisions of said Convention directly. In the event of it coming to light that any norm conflicts with the generally recognized principles and norms of international law or of an international treaty of the Russian Federation, then in examining specific cases it is necessary to apply the rules of the relevant international acts (decision of the Constitutional Court of the Russian Federation of 3 July 1997 No. 87-O). It is for this reason that no comprehensive law on combating discrimination aimed at protecting ethnic minorities, in particular Chechens, Roma and persons of African origin, has been adopted in Russia.

Item 2 of article 29 of the Constitution of the Russian Federation prohibits propaganda or agitation inciting social, racial, national or religious hatred and enmity and bars the propaganda of social, racial, national, religious or linguistic superiority. This is one of the most important guarantees of civil rights and freedoms on the part of the state.

Part 5 of article 13 of the Constitution of the Russian Federation prohibits the establishment and activity of public associations, whose aims or actions are directed toward violently changing the fundamental principles of the constitutional order and violating the integrity of the Russian Federation,

undermining the security of the state, forming armed units, and inciting social, racial, national and religious strife.

Women who are representatives of minorities and have been victims of gender-based violence or domestic violence are provided with judicial protection on a common basis. No targeted checks on observance of the rights of women of foreign origin belonging to ethnic minorities have been carried out due to an absence of any signs that laws were being violated. At the same time, prosecution agencies systematically carry out checks on observance of the rights of citizens, including those of the category indicated, to work, to health protection, and to social security and housing. Based on the results of these, the prosecutor's office takes the necessary response measures aimed at rectifying any violations identified and preventing future violations.

Violations of the rights of ethnic minorities are currently classified as hate crimes. Since 2007, relevant additional qualifying elements for a range of components of crimes have been incorporated in the Criminal Code of the Russian Federation, in pursuance of which a discriminatory component in a crime is a grave aggravating circumstance.

In accordance with the Constitution of the Russian Federation, policy with respect to combating discrimination and protecting national minorities is the responsibility of the federal authorities. At the same time, questions regarding implementation of this policy are decided jointly with the executive agencies of the constituent entities of the Russian Federation. On this basis, federal legislation is supplemented by a significant array of regional legislation implementing guarantees stipulated at the federal level.

Besides the legislative framework, a large inventory of acts of the Government of the Russian Federation relating to practical aspects of the implementation of policy with respect to combating discrimination and protecting national minorities exists.

Thus, with respect to countering discrimination and protecting national minorities, current legislation of the Russian Federation on the whole meets the requirements of the generally recognized principles and norms of international law as well as the international obligations of the Russian Federation (the ethnic composition of the Russian Federation in terms of gender is reproduced in the statistical annex).

Item 29

Since 2005, the basic powers with respect to social protection of the population have been delegated to the executive agencies of the constituent entities of the Russian Federation.

At the present time, the regional level is key to the implementation of basic social programmes. The authorities of the regions have the capacity, enshrined in law, to determine independently the nature of social support measures for a range of categories of the population and to vary substantially the regulations governing, and in particular the scope of, the social support provided, whether targeted or non-targeted in nature.

The powers of the government agencies of the constituent entities of the Russian Federation include powers on the provision of social support measures to elderly citizens, families with children, citizens on low income and other socially vulnerable groups of the population, as well as the provision of grants to local budgets for paying out subsidies to citizens to pay for housing and utilities.

The necessary regulatory and legal framework (laws, resolutions, packages of measures, regional programmes) determining the basic directions of social support for socially vulnerable groups in the population and providing specific measures of such support has been established in the constituent entities of the Russian Federation.

The main resources are directed toward monetary payments and benefits to various categories of the population, support for low-income families and development of a network of social protection institutions for meeting the needs of the population for social services, taking into account age differences, forms of social support and the principles underlying its provision (targeted or non-targeted).

The system of social protection is aimed at supporting the standard of living and quality of life of citizens who find themselves in situations of social risk. Social support is provided to the population via the payment of pensions and insurance-type and non-insurance-type benefits, the provision of non-cash transfers and the delivery of social services.

Records are kept in the constituent entities of the Russian Federation of elderly citizens and persons of all ages with disabilities, which makes it possible for social support measures which are expenditure commitments of the constituent entities of the Russian Federation to be set out in detail.

In the majority of the constituent entities of the Russian Federation, various kinds of support are provided for elderly citizens, such as rebates on the payment of housing costs and utilities, monthly cash disbursements established for certain categories of persons and financed from federal budget funds, free travel with a social travel ticket on all types of urban passenger transport (except taxis) and in communal motor vehicles (except taxis) on suburban and interurban district and regional routes, free travel on suburban rail and water-borne transport services or a 50 per cent discount on such travel, monetary compensation for telephone and radio usage or to the extent of 50 per cent of the payment amount, and a tariff plan with a subscriber payment system for an unlimited volume of local telephone connections (calls) which provides for 50 per cent off a given level of subscriber fee, and so on. Each constituent entity determines independently the type and scope of social support.

The provision of medical care for women with disabilities is implemented in accordance with the laws of the Russian Federation and the laws of the constituent entities of the Russian Federation as part of a programme of state guarantees to provide citizens of the Russian Federation with free medical care which determine the kinds of medical care, the regulations governing the scope of medical care, the regulations governing financial expenditure and the procedure for drawing up tariffs for medical care which are provided free of charge.

The provision of medical care is financed out of the funds from compulsory medical insurance, as well as from budgetary funds on all levels of the budgetary system of the Russian Federation.

Primary health care in outpatient polyclinic, inpatient polyclinic and hospital organizations, including for women during pregnancy and during and after childbirth, is provided out of the budgetary funds of municipal entities.

Order No. 808n of the Ministry of Health and Social Development of the Russian Federation of 2 October 2009 established Procedures for the Delivery of Obstetric and Gynaecological Care, which provide for the delivery of medical, psychological and social care for women with disabilities, in particular with respect to the influencing of reproductive behaviour.

For example, in connection with Moscow's designation of 2009 as a Year of Equal Opportunities, Order No. 349 of Moscow's Department of Health of 7 April 2009 provided for an increase in the

accessibility of obstetric and gynaecological care for women with disabilities and, in particular, provided for the provision of obstetric medical and preventive treatment facilities under its jurisdiction with medical equipment (adjustable height gynaecological chairs, obstetric beds, transformers, etc.) to cater to women with disabilities with disorders of the musculoskeletal system.

Social services for the disabled are implemented in accordance with and on the basis of procedures determined by the government agencies of the constituent entities of the Russian Federation with the participation of public associations for the disabled.

The executive agencies of the constituent entities of the Russian Federation are establishing special social services for the disabled, including for the delivery of groceries and manufactured goods to the disabled, and are approving a list of disability conditions for which they are entitled to a concessionary service.

Persons with disabilities requiring outside care and assistance are provided with medical and domestic services at home or in inpatient institutions.

Organization of the provision of social services for people with disabilities is regulated by a National Standard of the Russian Federation “Social Service of the Population. Social Services for Persons with Disabilities. GOST R 53059-2008”, established by Order No. 436-st of the Federal Agency for Technical Regulation and Metrology”, which entered into force as of 1 January 2010.

Said standard extends to social services provided for persons with disabilities, including children with disabilities, by state social service institutions and social service institutions of other ownership types, as well as by citizens engaging in entrepreneurial activity in the field of social services without forming a legal person.

Persons with disabilities are provided with the necessary telecommunication service means, special telephone sets (including for subscribers with hearing defects) and shared-use call offices. They are also provided with household appliances and facilities for the visually impaired and hearing-impaired which are required for social integration. The technical servicing and repair of technical equipment for the rehabilitation of persons with disabilities is carried out on a priority basis with exemption from payment or on discounted terms.

The provision of the material needs of persons with disabilities includes monetary payments for various reasons (pensions, benefits, insurance payments where the risk of health impairment was insured, payments in respect of compensation for damage caused to health, etc.) and a monthly payment which is set by federal law at a fixed amount of money and depends on the degree of incapacity of the person with a disability for work activity, as well as compensation in cases established by legislation of the Russian Federation.

A federal target programme “Social support for persons with disabilities for the period 2006-2010” is currently being implemented. More than 4.2 billion roubles have been allocated to it, 2.5 billion roubles of which come from the federal budget. Implementation of this programme should secure the return to work activity of around 160,000 persons with disabilities and the partial rehabilitation of around 2.2 million persons with disabilities. Analogous programmes are being implemented in the constituent entities of the Russian Federation.

Item 30

The situation of refugees, including refugee women, is regulated by Federal Law No. 4528-1 of 19 February 1993 “On refugees”.

Said law specifies the grounds and procedure for recognizing foreign citizens and stateless persons as refugees or for granting them temporary asylum in the territory of the Russian Federation, establishes economic, social and legal guarantees of protection of the rights and lawful interests of persons who have been recognized as refugees or have obtained temporary asylum and imposes on them obligations in accordance with the Constitution of the Russian Federation, the generally recognized principles and norms of international law and international treaties of the Russian Federation.

Requests by single women (foreign citizens and stateless persons) for asylum in the Russian Federation are extremely rare. Generally, women arrive as part of families accompanied by a husband or other male relatives who, as a rule, are the main applicants to be given asylum.

This law does not provide any special procedures for recognizing women seeking asylum as refugees. Despite this, Russia's migration agencies are establishing the necessary conditions to allow procedures to be implemented that take the gender of applicants into account.

This is due to a whole range of grave reasons for which women are unwilling to relate the circumstances of their appeal for asylum, since it is not always solely the complex internal political situation in her country of origin which compels a women to leave her home country. Against the backdrop of the situation in the country, such circumstances all too often include sexual assaults, abuse, violation of the rights of the female section of the population and other similar occurrences, leading to severe psychological trauma in women.

For this reason, in some cases, women, particularly unaccompanied women, pregnant women or women with infant children, require special support (including psychological or medical assistance, the provision of space for children to play and places for breastfeeding and childcare).

Where possible, with such women, the procedure for recognition as a refugee is dealt with on a priority basis. At all stages of the procedure, they are granted the right to choose an official to conduct an interview and a translator, and for this reason, such interviews are generally conducted by female personnel.

Complete confidentiality of the information provided by the women, including in relation to other members of her family, is guaranteed. The questionnaire sheets are drawn up taking gender into account.

When collecting and analyzing information about the country of origin of asylum-seeking women, particular attention is paid to the presence of factors which may lead to gender-related persecution.

Women who have been recognized as refugees in the territory of the Russian Federation enjoy the rights provided for by the Federal Law "On refugees" without any restrictions.

They are issued with a refugee certificate, which is an identity document in the territory of the Russian Federation and forms the basis for registration at a place of residence for the period of recognition as a refugee.

This renders a women more protected and independent and allows her to tackle her problems independently of her husband or other family members with whom she entered the Russian Federation.

Women refugees are entitled, on an equal basis with citizens of the Russian Federation, to medical and medicinal care, to receive assistance with assignment to vocational training or with job

placement, employment or entrepreneurial activity, as well as to social protection, including social security, in accordance with the laws of the Russian Federation.

They are entitled to receive assistance with arranging places for their children in state or municipal pre-school and general educational institutions and institutions of primary vocational education, as well as with their transfer to secondary and higher vocational educational institutions.

Women recognized as refugees may under the law of the Russian Federation and international treaties of the Russian Federation file an application to be granted the right to permanent residence in the territory of the Russian Federation or to acquire citizenship of the Russian Federation.

Their right to freedom of movement, choice of place of residence and domicile in the territory of the Russian Federation is not restricted in any way, except in cases provided for in the legislation of the Russian Federation with respect to foreign citizens and stateless persons.

The Russian Federation has under international treaties assumed obligations with regard to the protection of human rights, having signed, for example, the International Convention against Torture and other Cruel, Inhuman or Degrading Treatment or Punishment, under which it has undertaken not to expel, return or extradite any person to another state where there are substantial grounds for believing that he would be in danger of being subjected to torture.

In this connection, persons who do not have grounds for recognition as refugees may in certain cases be granted temporary asylum in the territory of the Russian Federation.

Temporary asylum is, in the first instance, granted to single women, including women with children of minority age to look after. An insecure environment because of armed conflicts or grave violations of human rights in the state of which they have citizenship and to which they have to return are often sufficient grounds for granting them temporary asylum.

Since temporary asylum is essentially permission to reside temporarily in the territory of the Russian Federation, then the Federal Law "On refugees" does not provide for any substantial preferences in respect of foreign citizens who have received it.

Under legislation of the Russian Federation, women who have been given temporary asylum are entitled to rely upon being able to reside in a temporary accommodation centre for persons seeking asylum, to use the public utilities there free of charge and to receive free food. They may be provided with assistance with assignment to vocational training at the temporary accommodation centre or with job placement.

They are entitled to medical and medicinal care in accordance with the legislation of the Russian Federation. At the same time, emergency medical care is provided for them free of charge.

Temporary asylum is granted for a period of one year and may be extended for each subsequent year if the circumstances which served as grounds for its being granted continue to apply.

Grounds for the forfeit of temporary asylum are rectification of these circumstances or receipt by the person of the right to permanent residence in the Russian Federation or acquisition of Russian citizenship or departure to a place of residence outside the Russian Federation.

The Law of the Russian Federation "On forced migrants" provides, as state support for forced migrants arranging their lives in the Russian Federation, for the rendering of assistance to them in joining a housing cooperative, assistance in building individual housing, including the allocation (acquisition) of a plot of land, and the acquisition of building materials, non-repayable subsidies for the construction (acquisition) of housing, assistance with the organization of compact settlements in the

territory of the Russian Federation and with the construction of housing, the establishment of an engineering and social infrastructure and the creation of jobs at the sites of the compact settlements, etc.

Single women with forced migrant status (also elderly or persons with disabilities), needing permanent care, are granted places in an institution for social protection of the population on a priority basis.

The right of forced migrants to freedom of movement and to choice of a place of residence and domicile in the territory of the Russian Federation is not restricted in any way.

October	7.7	8.2	7.2	6.7	10.6	45.7
November	8.1	8.3	7.9	7.4	10.4	47.6
December	8.2	8.8	7.6	7.1	11.5	45.2

The average age of unemployed persons in December 2009 stood at 35.1 years. Young persons up to 25 years of age constitute 27.1 per cent of unemployed persons, persons aged 50 years and older: 16.9 per cent.

Table 26
Unemployed persons, by duration of job search, as of end of November 2008

	<i>Women</i>	<i>Men</i>	<i>Distribution by gender, per cent</i>	
			<i>Women</i>	<i>Men</i>
Unemployed - total				
In thousands	2 388	2 901		
In per cent	100	100	45.2	54.8
Including searching for work, in months:				
Less than 1	13.1	14.7	42.4	57.6
From 1 to 3	18.8	22.5	40.8	59.2
From 3 to 6	15.5	15.6	45.1	54.9
From 6 to 9	7.8	7.4	46.5	53.5
From 9 to 12	8.7	8.9	44.6	55.4
12 and more	36.0	31.0	48.9	51.1

In 2008, the average duration of a job search was 8.0 months for women and 7.4 months for men. In December 2009, the average duration of a job search was 8.5 months for women and 7.6 months for men.

Table 27
Changes in the number of unemployed persons, by duration of job search

	Total number of unemployed persons, in thousands	Of which, as a percentage of the total number of unemployed persons, searching for work for						Average length of job search, in months
		Less than 1 month	From 1 to 3 months	From 3 to 6 months	From 6 to 9 months	From 9 to 12 months	12 months and more	
2008								
February	5 308	10.0	17.2	15.7	10.3	10.1	36.7	8.4
May	4 097	15.6	17.8	14.4	7.2	9.3	35.7	8.0
August	4 472	12.9	21.9	14.1	7.7	8.3	35.1	7.9
November	5 289	14.0	20.8	15.6	7.6	8.8	33.3	7.7
2009								
February	7 056	13.8	23.5	21.7	7.7	6.1	27.1	6.8
May	6 483	16.0	22.3	22.0	7.0	6.3	26.4	6.7
August	6 007	12.3	22.9	18.3	9.1	9.1	28.3	7.2
September	5 764	10.0	21.4	18.6	10.0	9.6	30.4	7.6
October	5 839	9.9	20.5	18.5	9.3	10.0	31.8	7.8
November	6 131	9.3	19.5	19.7	10.4	9.1	32.0	7.9
December	6 173	10.0	19.4	17.8	10.2	9.8	32.9	8.0

Unemployment is to a significant degree chronic, especially in rural areas. Of the 2.2 million unemployed rural inhabitants, 40.3 per cent have found themselves in a situation of chronic unemployment (have been searching for a job for 12 months or more).

Table 28
Unemployed persons, by duration of job search and place of residence, as of the end of November 2008
 (in per cent)

Have been looking for work, in months	Urban		Rural	
	Women	Men	Women	Men
Up to 3	35.1	41.4	26.3	30.6
From 3 to 6	16.4	18.1	13.9	11.6
From 6 to 12	16.2	15.5	17.0	17.4
12 or more	32.3	25.0	42.8	40.4

In 2008, the average duration of a job search in the urban population was 7.5 months for women and 6.6 months for men, in the rural population it was 9.0 months for women and 8.6 months for men.

Number of pregnancy terminations (abortions) and number of live births

Table 40

Pregnancy terminations (abortions), by age group

	1995	2000	2005	2007	2008
Number of abortions (in thousands) in women aged, in years:					
Up to 15	2.8	1.3	1.0	0.9	0.9
15-19	301.3	213.1	165.7	142.1	124.6
20-34	1 892.1	1 490.9	1 200.4	1 059.9	999.9
35 and older	570.2	433.4	308.6	276.2	260.3
Per 1,000 women aged, in years:					
Up to 15	0.5	0.2	0.3	0.2	0.3
15-19	57	36	20	27	26
20-34	122	98	72	62	57
35 and older	33	31	18	17	16

Table 41

Use of contraceptives

	1995	2000	2005	2007	2008
Number of women using intrauterine devices (as of year end):					
Total, in thousands	7 235	6 323	5 399	5 144	5 007
Per 100 women aged 15-49 years	18.9	16.0	13.8	13.3	13.1
Number of women using hormonal contraception (as of year end):					
Total, in thousands	1 747	2 829	3 711	4 012	4 120
Per 100 women aged 15-49 years	4.6	7.2	9.5	10.4	10.8

	1995	2000	2005	2007	2008
Operations performed with regard to the sterilization of women:					
Total, in thousands	...	18.5	16.6	14.3	14.7
Per 100,000 women aged 15-49 years	...	47.0	42.3	36.8	38.4

Table 42
Surgical intervention during childbirth

	1995	2000	2005	2007	2008
Total, in thousands					
Births – total	1 333.4	1 237.5	1 403.9	1 569.0	1 670.3
Of which normal	479.4	384.8	476.1	575.2	614.4
Obstetric operations performed:					
Forceps delivery	5.2	3.5	2.8	2.3	2.3
Vacuum extraction	1.3	0.3	0.9	2.0	3.4
Caesarean section	134.5	176.9	250.8	302.4	334.0
Foetus-destroying operations	0.8	1.2	0.4	0.3	0.4
Per 100 women					
Normal births	36.0	31.1	33.9	36.7	36.8
Obstetric operations performed:					
Forceps delivery	0.4	0.3	0.2	0.1	0.1
Vacuum extraction	0.10	0.03	0.06	0.1	0.2
Caesarean section	10.1	14.3	17.9	19.3	20.0
Foetus-destroying operations	0.06	0.10	0.03	0.02	0.02

Table 43
Health status of neonates

	1995	2000	2005	2007	2008
Children born unhealthy or taken ill (body mass 1,000 g or more):					
In thousands	383.3	474.1	575.9	614.3	628.0
As a percentage of the number of live births	28.5	38.0	40.7	38.9	37.3
Including with congenital abnormalities:					
In thousands	34.6	36.7	46.9	47.4	48.8
As a percentage of the number of live births	2.6	2.9	3.3	3.0	2.9
Particular conditions arising in the perinatal period					
In thousands	407.7	626.8	800.3	837.6	849.9
As a percentage of the number of live births	32.0	50.2	56.7	52.9	50.5
Of the total number of live-born infants - premature:					
In thousands	81.7	74.1	76.7	84.5	88.5
As a percentage of the number of live births	6.0	5.9	5.4	5.3	5.3

Table 44
Breastfeeding of children in the first year of life

	1995	2000	2005	2007	2008
Number of children being breast-fed, aged:					
From 3 to 6 months (in thousands)	569.8	464.8	544.7	558.8	612.0
As a percentage of the number of children who reached the age of 1 year in the year under review	45.1	42.3	40.1	40.3	40.8
From 6 months to 1 year (in thousands)	411.3	320.0	487.5	537.5	589.6
As a percentage of the number of children who reached the age of 1 year in the year under review	32.5	29.5	35.9	38.7	39.3

Table 45
Curative and preventive care for women and children (as of the year end)*

	2001	2002	2003	2004	2005	2006	2007	2008
Number of obstetricians/gynaecologists, in thousands	42.0	42.2	42.6	42.8	42.9	43.5	43.6	43.3
Number of beds for pregnant women and neonates, in thousands	87.8	85.9	85.0	83.7	81.9	82.3	82.0	81.1
Number of beds for gynaecological patients, in thousands	92.2	87.1	84.6	82.3	81.7	79.1	76.7	72.9
Number of women's clinics, obstetric/gynaecological departments (units), in thousands	7.9	7.6	7.6	7.7	7.7	7.4	6.8	7.0
Number of medical and obstetric centres, in thousands	44.3	43.9	43.6	43.4	43.1	42.3	39.8	39.8
Number of paediatricians, in thousands	69.9	69.6	69.3	68.6	68.6	69.8	69.4	69.4
Number of paediatric hospitals**	433	426	420	409	407	382	365	357
Number of beds for paediatric patients, in thousands	229.1	224.1	214.0	210.4	200.3	194.9	190.2	191.9
Number of beds in paediatric inpatient wards, in thousands	73.6	91.2	83.1	81.3	69.6	67.6	-	-
Number of paediatric clinics and outpatient units, in thousands***	7.9	7.6	7.6	7.5	7.3	6.1	4.7	4.7
Per 10,000 women:								
Number of obstetricians/gynaecologists	5.4	5.5	5.6	5.6	5.6	5.7	5.7	5.7
Number of beds for gynaecological patients	11.9	11.3	11.1	10.8	10.7	10.4	10.0	9.6
Per 10,000 women (15–49 years):								
Number of beds for pregnant women and рожениц	22.2	21.6	21.4	21.2	20.9	21.1	21.2	21.3
Per 10,000 children (0–14 years)								
Number of paediatricians	28.7	30.0	31.2	31.9	32.0	33.4	33.3	32.9
Number of beds for paediatric patients	94.1	96.6	96.2	97.8	93.5	93.3	91.3	91.0
Number of beds in paediatric inpatient wards	29.8	31.4	36.6	36.6	32.7	32.4	-	-

Education

Table 46

Level of education of women and men, according to population census data

	2002			
	In thousands		Distribution by gender, per cent	
	Women	Men	Women	Men
Total population aged 15 years and older	65 893	55 407	54	46
Including having vocational education:				
Higher education (including postgraduate)	10 766	8 613	56	44
Incomplete higher education	2 018	1 722	54	46
Secondary education	19 052	13 877	58	42
Primary education	6 661	8 706	43	57
General education				
Secondary education (complete)	10 938	10 338	51	49
Basic education	8 882	7 813	53	47

Table 47

Number of students, by type of state and municipal educational institution, as of the beginning of the 2008/2009 academic year

	Distribution by gender, per cent			
	Women	Men	Women	Men
Number of students – total				
In thousands	11 549	11 068		
In per cent	100	100	51	49
Including in:				
Institutions of general education	56.2	58.8	50	50
Institutions of primary vocational education ²	3.3	6.6	35	65
Institutions of secondary vocational education	9.3	9.6	50	50
Institutions of higher vocational education	30.6	24.2	57	43
Postgraduate studies ¹	0.6	0.7	45	55
Postdoctoral studies ¹	0.0	0.0	47	53

¹ As of end of 2008.

² Based on Russian Federal Education Agency data, including the number of students at institutions of secondary and higher vocational education completing primary vocational educational programmes.

Table 48

**Composition of the convocation of deputies to the State Duma in 2008-2011,
as of 1 January 2009**

	<i>Number of</i>		<i>Distribution by gender, per cent</i>	
	<i>Women</i>	<i>Men</i>	<i>Women</i>	<i>Men</i>
